About ASUS

ASUS, the world's top 3 consumer notebook vendor and the maker of the world's bestselling and most award winning motherboards, is a leading enterprise in the new digital era. ASUS designs and manufactures products that perfectly meet the needs of today's digital home, office and person, with a broad portfolio that includes motherboards, graphics cards, displays, desktop PCs, notebooks, servers, multimedia, wireless solutions, networking devices and mobile phones. ASUS has been rated No.1 in product reliability for notebook PCs by SquareTrade and Rescuecom in the United States, and is the fastest-growing of the top ten notebook brands in the world. Driven by innovation and committed to quality, ASUS won 3,268 awards in 2009, and is widely credited with revolutionizing the PC industry with the Eee PC™. With a global staff of more than ten thousand people and a world-class R&D team of 3,000 engineers, ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010".

ASUS Company Profile

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (Q3, 2010), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 2 notebook brand in Central and Eastern Europe
- The Top 3 notebook brand in Western Europe
- The Top 4 notebook brand in Asia Pacific, excluding Japan

Asia Pacific

Europe

ASUS is the No. 1 Motherboard Brand in the World

- ASUS had shipped 260,000,000 motherboards since 1992
- One in every 3 PCs sold worldwide in 2009 was equipped with an ASUS motherboard inside. The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS has the best quality & reliability notebooks.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No. 1 in Quality & Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

ASUS received 3,268 Awards in 2009

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,268 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS - a Top 3 Global Consumer Notebook Brand

IT research firm International Data Corporation (IDC) recently revealed that ASUS has established itself as a **global top 3 consumer notebook brand**.

VENDOR	2010 Q3 (units)	RANK
Acer Group	6,091,000	1
HP	5,634,000	2
ASUS	3,453,000	3
Toshiba	3,037,000	4
Dell	2,839,000	5
Lenovo	2,177,000	6

Showing our strong brand recognition and trust, ASUS has been recognized as a top 3 global consumer notebook brand for four consecutive quarters, with almost 12 million units shipped during that time frame.

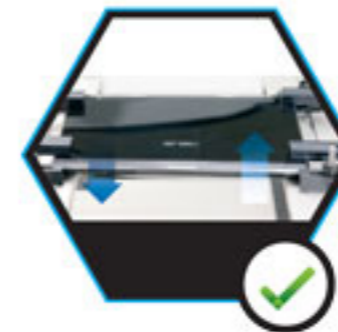

At ASUS, we aim to inspire and motivate. We continue to demonstrate our passion for technology and focus on quality to ensure that ASUS remains a global frontrunner in this new digital era. That is what Inspiring Innovation-Persistent

Extreme Testing for top-quality notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Twist test

Notebook lids opened with one hand can cause screens to flex. The twist test assesses how well notebooks cope with this type of handling by twisting the entire chassis to extreme degrees.

Shock test

Notebooks are likely to experience shocks during shipping and day-to-day use. So ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Vibration test

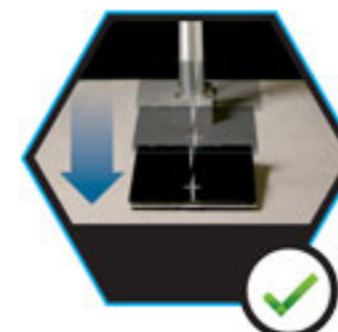

Shock is the one common laptop stress—vibration is another. The Vibration test subjects notebooks to a range of vibration frequencies to ensure that both the outer construction and internal components are able to cope.

Hinge test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness.

Drop test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its models through a series of drop tests that measure how well they cope with life's little accidents.

Pressure test

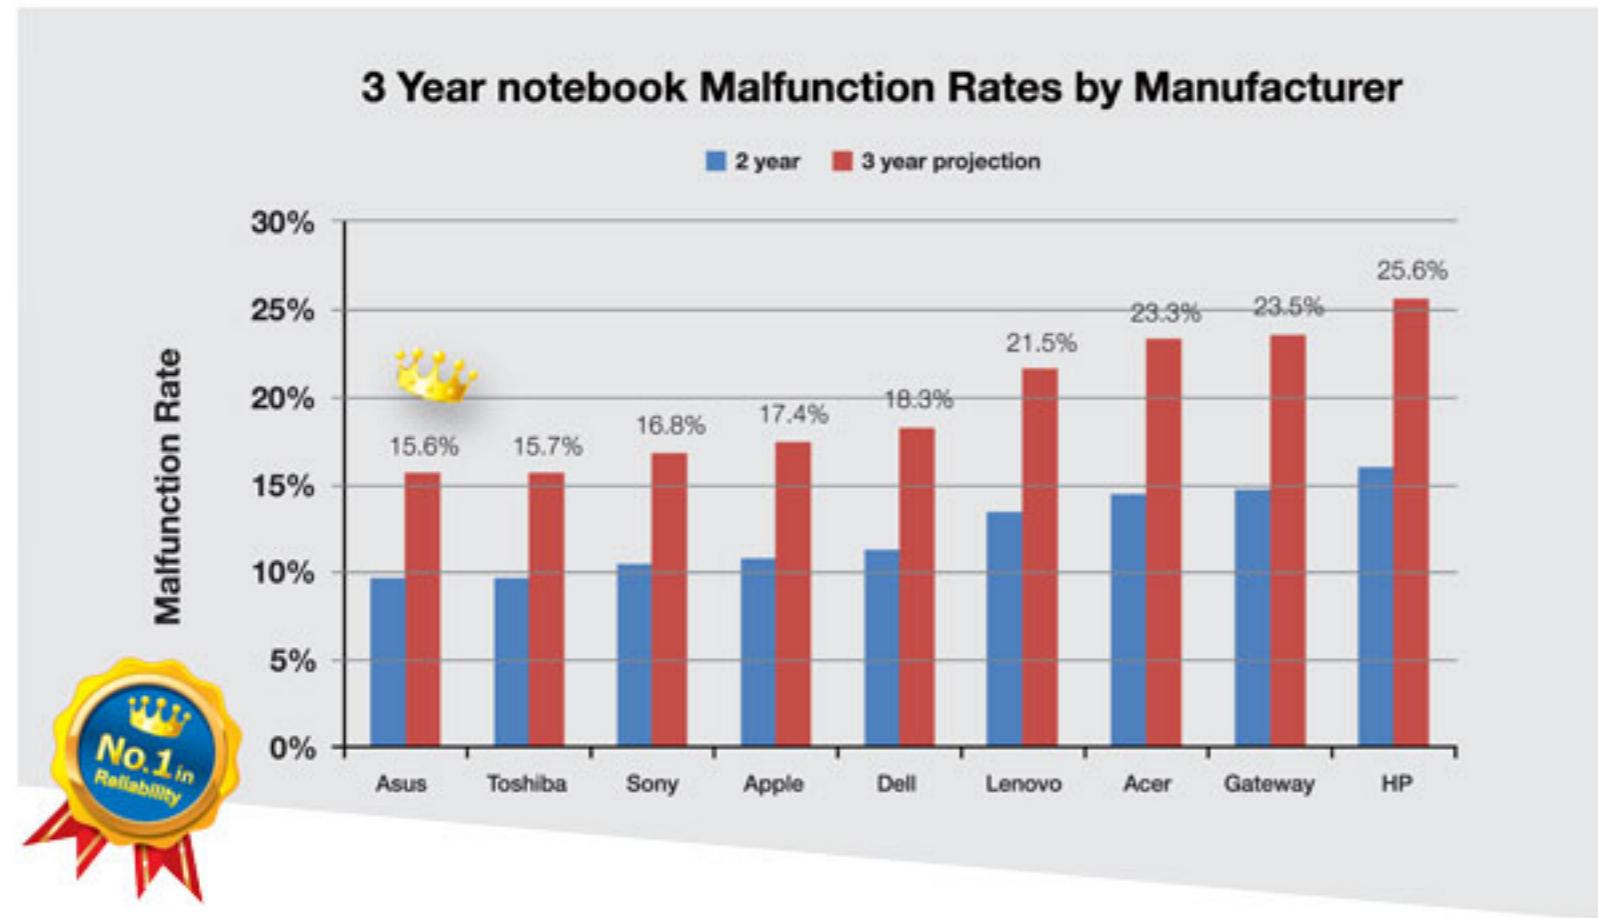

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests.

Survey of 30,000 notebooks lists ASUS as top of reliability ranking

In November 16th, 2009, SquareTrade, the largest independent warranty service provider in United States, published a report that analyzed the failure rates of over 30,000 new notebook computers manufactured by the leading 9 notebook brands over the past 3 years. A minimum of 1000 unit notebooks of each brand was sampled.

- According to this survey: "in terms of brands, ASUS stood out as the most reliable manufacturer. Acer, Gateway & HP had failure rates significantly higher than the average."

With 3 years malfunction rates to be under 16%, notebooks from ASUS are nearly 40% more reliable than Hewlett-Packard, the worst performer in this study. The industry leader HP, which shipped nearly 16 million notebooks in the pass year according to IDC, ranked dead last in this reliability study with over one-fourth of notebooks expected to malfunction in 3 years. Gateway and Acer, the No.2 maker of notebooks, were also nearly unreliable as HP, with an expected malfunction rate of over 23%

ASUS Ranked No.1 in Reliability

Record-setting Score of 1791 in RESCUECOM's Computer Reliability Report Puts ASUS More than 1105 Points Ahead of Nearest Competitor

RESCUECOM

RESCUECOM, the industry-leading computer repair experts in the United States, assessed the world's top computer manufacturers according to the number of calls made to the RESCUECOM call centre vis-à-vis each company's market share, and ASUS far outshone the rest of the field with a disproportionately small number of calls requesting for help with its products. ASUS, the leader in PC innovation, quality and design, is now the clear leader in reliability as well, according to the latest RESCUECOM Computer Reliability Report released on August 30th, 2010.

ASUS was awarded a score of 1791—a RESCUECOM record—placing it emphatically at the top of the table and prompting RESCUECOM to dub ASUS the "new leader in reliable personal computers".

"We are delighted with, but are not surprised by, this result," said Cecilia HF, Director of Marketing, ASUS. "We have invested enormous resources in ensuring that our products are of the highest quality, and that our customers get the best after-sales service possible. We insist on perfection in everything we do—a philosophy that is captured in our new corporate slogan 'Inspiring Innovation - Persistent Perfection'—and are very pleased to see our efforts reaping dividends in the form of a smooth customer experience."

Position	Manufacturer	Reliability Score
1	ASUS	1791
2	APPLE	686
3	IBM/Lenovo	524
4	TOSHIBA	368
5	HP/COMPAQ	281
6	SONY	262
7	ACER	218

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

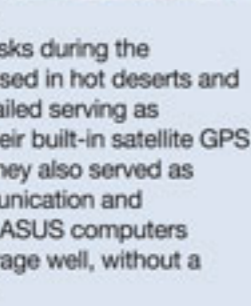

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

On the world's highest peak

ASUS Notebooks Are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly; it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

The Most Recommended Brand Among Others Voted By You!

ASUS won four prestigious annual awards, Best 3D laptop, Best Entry Level Laptop, and Best CULV laptop and Best Netbook, by public vote in What's Laptop Magazine in the UK.

ASUS won "2010 Readers' choice" in PC Magazine and "2010 Tech Brand You Can Trust" in PCWorld in the United States; both awards are by public vote.

ASUS won Best PC & Laptop Manufacturer of the year 2010 by Customer PC Magazine in the UK.

ASUS Product Won 3,268 Awards in 2009

A Testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,268 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Pick-Up & Return Service at Your Door Step

Still finding a nearest Service Center? Or too busy to send over your notebook to a particular Service Center?

Now, ASUS provide an exclusive solution for you! Other than 2 years Global Warranty, ASUS also provide a premium **PICK UP & RETURN SERVICE** for end users & dealers.

Pick up & return service allows end users to request for door-to-door pick up service or you may just drop your notebook/Eee PC to your nearest dealers.

While for dealers, a simple call/email will instantly get a specialist to pick up the notebook/Eee PC from your outlet in order to save your time and human resources. In terms of pick up lead time, we can provide earliest of 1 day and latest of 4 days to assure the quality of our service.

There are only 5 simple steps to apply ASUS Pick UP and Return service.

How to apply Pick Up & Return Service?

- (1) Call/Email to request Pick Up & Return Service, Tel : 03-6259 5077, email address : asusmy@streamyx.com
- (2) Reply email for Service and your detail verification.
- (3) Print out the docket from the e-mail.
- (4) Stick the docket on the NB or EeePC cartons.
- (5) Wait for the courier to pick up.

Terms and Conditions:

- (1) The Pick-Up & Return service applies to ASUS Notebook and Eee PC only.
- (2) The Pick-Up & Return service for defective unit within warranty period will be free of charge.
- (3) Out-of-warranty, non-defective or customer-induced damage units are not covered by Pick-Up & Return service. In such cases, dealer or end user needs to carry in for repair.
- (4) Pick-Up & Return service only applies to RMA repairs and does not apply to DOA claims.
- (5) Any Location/City/Town not falling in any zone listed in zone table will be considered non-service area. Any shipment to non-service area is subjected to additional service rate or charge. (refer page 14 for zone table)
- (6) Additional service charge is applicable for delivery to any Island (e.g. Langkawi, Redang, Pangkor and etc) except Penang Island.

Information Required When Submitting Pick up & Return service request:

- (1) Dealer full company name/End User Name.
- (2) Contact person, phone number and email address.
- (3) Shipping Address
- (4) Product serial numbers
- (5) Product Symptom description

Notebooks that exceed your expectations

ASUS | MULTIMEDIA SERIES

Crystal-clear screens, fast processors and powerful graphics deliver outstanding multimedia performance, whether you're creating digital content—or just enjoying it.

ASUS NX90

18.4" Breaking Silence
A Duet of Style and Sonority

ASUS N43/N53

14" & 15.6" Here the Power, Feel the Power

ASUS | EXTREME GAMING SERIES

The fastest processors and most powerful graphics, combined with striking design, make the Extreme Gaming Series a must for anyone who wants to game on the go.

ASUS G53

17.3" Strike in silence

ASUS | ULTRA PORTABLE SERIES

The perfect travel companions for business users on the move. Exclusive design touches including leather and bamboo trim add a stylish personal touch, while cutting-edge technology ensures the best performance of performance and battery life.

ASUS U33 / U43

13.3" & 14" Inspired by Nature. Designed for style.

ASUS U36 / U41

ASUS | PERFORMANCE SERIES

The Performance Series is designed for people who need a solid, reliable notebook for everyday activities. The range includes both affordable all-round models and high-performance portables.

ASUS A42 / A52

14" & 15.6" The perfect fit for work and play

ASUS X42

14" Mobile Computing Performance

ASUS | Eee PC

Holding true to its "Easy, Excellent, Exciting" vision, ASUS has steadily upped the ante on netbook development across the realms of design, services and performance. The Eee PC™ netbooks also feature the very best and very latest in technology.

Eee PC™ 1215P

12.1" Go Anywhere in Style

Eee PC™ VX6

12.1" ASUS-AUTOMOBILI LAMBORGHINI

Eee PC™ 1015PEM

10.1" Designed to Keep You on the Move

Eee PC™ 1015PW

10.1" A Dual-Core Netbook Affords More Versatility

ASUS NX90 Breaking Silent

A Duet of Style and Sonority

The new 18.4" ASUS NX90 multimedia notebook, revisits the forgotten aspects of portable PC design, injecting excitement and a sense of premium luxury that is crafted by the chief designer of Bang & Olufsen, Mr. David Lewis, and co-development with Bang & Olufsen ICEpower®, comes in as a notebook that is on a par with full surround systems in

terms of audio quality through the ASUS SonicMaster sound standard. It is further a style icon, an atelier craftsmanship, premium luxury and unprecedented sonic refinement come together spectacularly in the new ASUS NX90, a multimedia notebook for those with discerning tastes in audio and style.

Birth of an Icon

The NX90's unique form and advanced technology have benefitted from the experience of award winning designer David Lewis, who took part in developing the new multimedia notebook. Mr. Lewis' studio is known to design buffs and audiophiles the world over as one of the main forces behind the hallmark Bang & Olufsen look. Thus, eye-catching multimedia gear has been a staple of his studio for many years.

David Lewis

A Revolution in style

NX90 is the world's first notebook using polished aluminum material that give the flawless shining finish, destined to become the centerpiece of your living room, a beacon of style and beauty that will add a touch of class to any decor. It is also the first notebook with loudspeakers outside of a notebook and feature dual touch pads, positioned at either side of the elegant keyboard, which serve as an intuitive and enjoyable to manage and play your multimedia content. The oversized palm rests provides ample of room for your comfort even during prolonged sessions, one of the perks of a true multimedia desktop replacement portable PC.

New Audio Standards –It's Meant to be Enjoyed

SonicMaster, a new audio standard developed by ASUS Golden Ear team through a significant cooperation with Bang & Olufsen ICEpower®, guarantees the best quality audio that is beyond your expectation. SonicMaster comprises of harmonized hardware and software tuning optimized to render high definition surround audio that's true to life and wider in range than ever experience on a

notebook. The exacting standards implemented in SonicMaster guarantee crystal clear reproduction, deeper and richer bass, and an overall power upgrade that's sure to amaze anyone listening in for the first time. Particular emphasis has been placed on recreating the audio in a true-to-life surround as if transporting listeners to a live concert, miles ahead of the muddy, muted and tinny sound people have come to expect from a notebook.

Ultimate smart performance

Sensational Speed – USB3.0, Bluetooth 3.0, Powered by latest Core i7

ASUS is the world's 1st to introduce the new USB3.0, the data transfer rate is 5Gbps, which is 10X faster than USB2.0 at 400Mbps. This allows for transfer of high definition data, such as movies, videos, large capacity file formats. Powered by the latest Core™i7 processor and equipped with lightning-fast USB3.0 and Bluetooth 3.0 connectivity, the NX90 is guarantee to deliver sensational speed in terms of computing and data transfers.

Stunning Visual – Perfect for HD 1080p

A revolutionary multimedia, NX90 is equipped with a Full High Definition 1080p (1920 x 1080) 18.4" widescreen LED-backlit display delivering crisp, detailed and richly-colored images at silky smooth frame rates. It also houses a slot-in Blu-ray DVD combo drive for high quality movie entertainment when you are on the move.

Ergonomic dual touch pad – DJ-like multimedia enjoyment

ASUS NX90 is the only notebook in the world features two touchpad located at both side of the elegant keyboard, giving it an extra touch of originality and exclusivity. It can be used as a virtual mouse or use together with ASUS Rotation Desktop software for DJ-like multimedia control. It's truly a new way of interaction.

ASUS N series

Hear the Power Feel the Power

ASUS SonicMaster Composes New Notebook Audio Standard

Contemporary users utilize diverse applications, from precision productivity to high definition entertainment and gaming. Expectations run high and traditionally compromised notebook audio performance simply doesn't suffice—this resulted in development of the N Series from ASUS, once again revolutionizing the multi-role nature of notebooks with professional multimedia and hardware.

SonicMaster gains from the expertise of both the audio professionals at the ASUS Golden Ear Team and the respected experience garnered by Bang & Olufsen ICEpower®. It's not a one-off, nor a gimmick, presenting a new professional audio certification program, with SonicMaster-compliant notebooks guaranteeing consumers breathtaking sound. It consists of larger speaker chambers and stronger amplifiers to render unmatched fidelity, in addition to extensive software equalization for wide range reproduction and full-liveness vocals, where previous notebooks settled for tinny output.

ASUS N43J

CHIP OCTOBER 2010 : Review

"Gorgeous design, Fantastic audio, USB 3.0."

ASUS N53J

HWM OCTOBER 2010 : Lab Test

"Performance-oriented notebook for mobile multimedia enthusiasts."

SonicMaster delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Distinct vocals

Vocal performance on SonicMaster notebooks sound uncannily concert-like, as if transporting listeners to a live show.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like standalone hi-fi systems.

Lifelike surround

Implementing the latest codes, SonicMaster brings a 3D feel to movies and games.

Comprehensive Power

N Series notebooks go beyond revolutionizing sound performance. They present complete hardware innovation. All new Intel Core processors deliver smooth computing, while super-fast USB 3.0 allows users to manage large multimedia libraries. The experience revolves around fast, productive technology to enable enjoyment and creativity.

Exclusive ASUS Super Hybrid Engine streamlines the ample power of these notebooks, optimizing performance for every task while minimizing energy wastage. The results are longer battery life and an average 12.6% increase in performance.

Powerful graphics

Select N Series notebooks ship with the latest NVIDIA GeForce mobile solutions on board, pushing exciting performance in games, high def video, and more. These graphics engines ensure high resolutions and smooth video throughout, while remaining energy efficient to promote longer battery life and usability.

The 100% zero-dot-guaranteed LED screens that ship with the new N Series make the most of ASUS Video Magic image enhancement. This unique tool upscales DVD playback up to full HD. It also supervises GPU computing for greater output during intense multitasking, and works together with ASUS Splendid HD to balance color, brightness and contrast for constant viewing pleasure.

New N Series notebooks feature NVIDIA CUDA GPU general processing for faster performance. Working together with graphics optimization suite Video Magic, it allows notebook users to upgrade DVD quality 480P (resolution 720 x 480) to Full HD quality 1080P (resolution 1920 x 1080). In addition, the frame rates may be upped from 24/30fps to 60/72fps. Thus, notebook users don't have to settle for limited specs and slower speeds.

ASUS U Series Bamboo Collection

Protecting nature is a joint effort that unites us all, but it doesn't have to exclude innovative design, memorable style and powerful computing potential. With a U Series Bamboo Collection notebook, you can do your part for the environment without compromising cutting edge computing and stylish mobility. It's the natural choice, really.

<p>ASUS U43</p> <p>CHIP AUGUST 2010 : Review "Beautiful, natural aesthetics Solid specs"</p>	<p>ASUS U33</p> <p>PC.COM OCT 2010 : Tested "One of the best looking laptops we've seen in a while. USB3.0 support is a welcome addition...."</p>	<p>ASUS U43</p> <p>PC.COM OCT 2010 : Tested "One of the best looking laptops we've seen in a while". USB 3.0 support is a welcome addition, handsome for the environment.</p>
---------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Inspired by Nature, Designed for Style.

The svelte U Bamboo Collection transcends personal notebook PCs for a whole new generation of users. At first glance, this unique series notebook stands alone with an eye-catching resilient bamboo shell that uses 20% less plastic than traditional notebooks. But apart from its aesthetic appeal, it packs wealth of powerful features for your every needs and wants.

The Beauty of design : Elegant smoky brown bamboo exterior exudes an organic quality reminiscent of designer furniture

If you're both fashion and eco conscious, the U Series Bamboo Collection was made for you. Each notebook sports a smoky brown bamboo exterior that's not overly treated so as to retain its organic look, properties and tactility—creating a personal journey for person and machine as the wood matures and changes with time. The natural bamboo is juxtaposed with sleek, brushed aluminum interior surfaces and a seamless chiclet keyboard that is as comfortable to use as it is great to look at. These smart design decisions add up to a notebook that's very light, making it easy for you to become an ambassador of good taste and environmental responsibility.

U Series Bamboo Collection notebooks also feature Syncables technology that enables effortless syncing with a plethora of devices, including desktop PCs, other notebooks, smartphones and digital cameras. This makes it easy to share files, backup data and access collections quickly. Intelligent syncing allows you to get more done using one light notebook as your nexus—invariably reducing the overall energy footprint as less equipment needs to be powered on at the same time.

The Beauty of Performance : Boosting CPU performance by 11% and extending battery life to 10.5 hours

U Series Bamboo Collection notebooks are as brainy as they are beautiful. ASUS' exclusive **Super Hybrid Engine (SHE)** monitors processing loads and delivers the exact amount of power suited to the task at hand. Energy efficiency is further bolstered by NVIDIA Optimus technology that switches between high end discrete graphics and normal integrated visuals, depending on system usage.

USB 3.0 is another new addition to the range, enabling data transfers that are up to ten times faster than USB 2.0. USB 3.0 is fully backward compatible, so you can be assured that all of your existing USB devices can still be used. And while transferring massive content and large files in mere seconds is a plus, USB 3.0 is also good for the environment, since it charges devices much faster than USB 2.0, requiring less power to do so.

Smart performance with a boost

The Beauty of Sight and Sound : LCD panel comes with a Zero Bright-Dot guarantee and Altec Lansing speakers deliver high fidelity audio

The U Series Bamboo Collection is designed to deliver a stunning audio-visual experience. The vibrant and crisp LCD panel comes with a Zero Bright-Dot guarantee, providing peace of mind against dead pixels, while ASUS Splendid Video Intelligence Technology automatically tweaks colors, sharpness and other visual parameters to ensure the best experience regardless of the content being viewed. The superb visuals are matched by the notebook's pristine and accurate audio delivery, thanks to high fidelity SRS Premium Surround Sound.

ASUS U Series

Stunningly light, Powerfully beautiful

Propel your productivity and entertainment to a new level with the ASUS U36/U41 notebook—an ultra-slim and energy-efficient powerhouse that accelerates your daily computing tasks without weighing you down. When it comes to supreme speed and sleek style, nothing else comes close.

Super thin notebook with Intel standard voltage CPU

In today's world, more of our daily computing is done on the move, and notebooks have become an essential part of our lives. In the past, having a notebook that was thin and lightweight meant sacrificing performance. Not anymore. Equipped with an Intel® standard voltage CPU, accelerates performance to match your workload, so you can enjoy the maximum possible speed. Along with ASUS Super Hybrid Engine technology giving a boost in performance when needed, the U series offers the absolute best combination of performance for the size.

ASUS Super Hybrid Engine for an incredible 10 hours battery life

As an urban professional constantly on the move, having a notebook that can keep up with you is of absolute importance. That's why the U series feature not one, but two energy-optimizing technologies that work together to ensure that the notebook stays running for an incredible 10 hours! While the U Series may feature a standard voltage CPU and a powerful GPU, that doesn't mean the battery drains quickly. Thanks to ASUS' Super Hybrid Engine, the "Battery Saving" mode intuitively reduces notebook power consumption based on usage for extended battery life. Coupled with NVIDIA® Optimus™ technology, the U Series last an incredible 10 hours.

ASUS Super Hybrid Engine boosts performance up to 15 percent

With its supercharged performance, the ASUS Super Hybrid Engine boosts the U41 notebook performance up to 15 percent in demanding tasks, thanks to its dynamic overclocking technology. It's not simply about cranking up the CPU though, ASUS engineers have specifically tuned several system-wide values to optimise the performance gains for the energy used, and Super Hybrid Engine is designed to work specifically on Intel® Core™ i3, i5 mobility processors! The Super Hybrid Engine boosts performance only when required by CPU-intensive tasks, like games and high definition movies, without sacrificing any stability and reliability.

Slim, Light and Powerful

Combined with its extremely slim, lightweight and beautiful under an 1-inch thin design, the U series notebooks can be easily slipped into any backpack or briefcase. In the past, having a thin and lightweight meant sacrificing performance. Not anymore, with an Intel® standard voltage CPU along with ASUS Super Hybrid Engine technology giving a boost in performance when needed, it raises the bar even further creating the most powerful ultra-portable in the world.

Smart performance
with a boost

Super Slim Design with Altec Lansing delivering high fidelity sound

U series notebook is astonishingly thin and sleek, coming in at less than an inch. Their slender forms make them extremely lightweight, while brushed aluminum lids further contribute to keep the notebook overall weight down. Despite its slimness, a pair of Altec Lansing® speakers, complemented by SRS Premium Sound™ technology, delivering high fidelity sound for your listening pleasure.

Exclusive thermal technology

Like humans, the harder a computer works, the hotter its internal temperature gets. The problem with pushing a computer to the limits is the amount of heat it generates and how to get rid of it. With the U series, ASUS engineers tackled this problem by developing exclusive thermal technology to keep not only the system cooler, but the palm rest area as well. Using dual lightweight heat pipes and an efficiently-designed layout, heat is transferred away from the palm rest for a more comfortable user experience.

ASUS A series

Best Performance Discrete Graphics with 2GB VRAM

All ASUS A series comes with discrete graphic card to deliver a mind-blowing visual performance.

A Compelling Multimedia Experience

A high definition LED panel with a 16:9 aspect ratio display adorns the ASUS A42 series, complemented by Altec Lansing® speakers with SRS Premium Sound™ for a compelling multimedia experience. With HDMI support, the expansion possibilities are limitless connecting to HDMI-compatible TVs, consoles and entertainment systems.

Palm Proof technology

The Palm Proof technology-equipped touchpad distinguishes between the contact surfaces of the palm and fingers to prevent inadvertent cursor movements during typing.

Power4Gear with self-adjusting fan speeds for quiet computing and saves battery at the same time

ASUS Power4Gear automatically adjusts fan speeds for quiet computing and prolonged battery life.

Eee PC™ VX6

ASUS- AUTOMOBILI LAMBORGHINI

Driven by Style, Wrapped in Prestige

Inspired by the Lamborghini Murcielago LP640 roadster, the ASUS-AUTOMOBILI Lamborghini Eee PC VX6 epitomizes elegance and power fused in perfect harmony. Clad in either shiny piano black or pearlescent white, this notebook PC contrasts and combines delicate refinement and style with sheer powerhouse performance.

Unprecedented Performance Meets Energy-Efficiency

NVIDIA® Optimus™ technology intelligently switches between integrated and discrete graphics to provide the optimum graphics solution required, thereby extending battery life in the process.

It spoils users with a responsive chiclet keyboard and glossy touchpad, reacting to every movement and gesture with the comfort of carefully engineered ergonomics and soft, tactile palm rests.

While the computing is as relentless as the performance of its supercar namesake, the VX6 doesn't stop there. It delves into indulgent multimedia layering, enveloping users in audio by Bang & Olufsen ICEpower®, resulting in crystal clear, dynamic and powerful sound that's bound to sweep listeners off their feet and take them on a journey of adventure, whatever their fancy.

Delivering Multimedia Enjoyment in Drones

The brilliant 12.1-inch LED-backlit screen guarantees a crystal clear view for both work and play, making the Eee PC VX6 an irresistible highperformance ultra-portable.

The ASUS-AUTOMOBILI Lamborghini Eee PC VX6 comes with USB 3.0*, enabling you to transfer data at speeds up to 10 times** faster than current USB 2.0 connections. Speed and efficiency in a stylish mobile platform, your VX6 is a perfect combination of beauty and performance.

Eee PC™ 1215P Seashell

A 12" high-definition (1366x768) netbook with a dual-core processor

The Eee PC™ 1215P marks a radical departure from other netbooks with its Intel® Atom™ N550 Dual-Core processor, that sets new records for netbook performance mobility. The 1215P is capable of smooth, crystal-clear playback of high definition videos in 1080p on its 12-inch WXGA 1366 x 768 HD widescreen with the 16:9 display ratio.

Long Lasting, Efficient Connectivity

The Eee PC™ 1215P comes with a large 6-cell battery for up to 8 hours battery life **, and with up to 320GB of internal hard drive space as well as a complimentary 500GB* ASUS WebStorage, there is ample storage space.

Ergonomically Designed for You

The Eee PC™ Seashell 1215P boasts a streamlined and aerodynamic design with strongly defined contours. ASUS' approach to material innovation means that your 1215P will be available with a smooth matte or high gloss coating.

With its 12.1" WXGA display, the 1366 x 768 resolution and 16:9 aspect ratio is ideal for HD video, while the LED backlighting gives it a better contrast ratio but with a lower power than previous designs. Combined, these allow for longer, more comfortable viewing and its increased resolution over standard netbooks gives more screen real estate for multitasking.

The chiclet keyboard in the Eee PC™ Seashell 1215P is more comfortable to type on, and combined with its larger form factor and the extended wrist rest, it gives less typing fatigue even after prolonged periods of use.

Eee PC™ 1015PW Seashell

Makes Waves in Style

The new Eee PC 1015PW sport a new wave design of style which is intricately detailed and hand sculptured. It's features a 10.1" LED backlit LCD monitor and an ergonomic chiclet keyboard and large touchpad deliver a very comfortable feel even after a prolonged use. These elegantly styled aesthetics netbook with only 1.25kg to carry are complemented with the intense and powerful Purple Rain, glamorous Gold Dust and delicately warm Angel Skin color of your choice.

Intel® Atom™ Dual-Core Processor : 23 Percent Faster

The Eee PC™ 1015PW marks a radical departure from other netbooks that usually feature single core Atom™ processors. With its Intel® Atom™ N550 dual core processor, the Eee PC™ 1015PW will set new netbook performance benchmarks. More importantly, this Dual Core Processor shatters today's netbook conventions by delivering a rich performance experience. In terms of performance, the 1015PW has clocked at speeds at least 23 percent (Comparisons done with a single core Intel Atom N455 processor, test conducted by PC Mark.) faster than single core processor netbooks.

Super Hybrid Engine provides battery life to 10 hours**

Enjoy a all day long computing with ASUS Super Hybrid Engine power management technology provides up to an impression 10 hours of battery life.

Ergonomic Design

It's ergonomic chiclet keyboard and large touchpad deliver a very comfortable feel, even after prolonged periods of use, while its 10.1" LED backlit LCD monitor gives an evenly lid, easy to read display. The 1015PW also features a camera cover over the webcam's lens to give you added privacy.

ASUS Notebook

The Choice of IT Professionals

In today's digital age, notebooks store lots of sensitive personal data. That's why IT professionals all over the world choose ASUS notebooks; they know that ASUS is synonymous with quality and reliability. Whatever you use your notebook for watching movies, listening to music or viewing photos—ASUS is the natural choice delivering technology and style. But don't take our word for it. Consult an IT expert before purchasing a notebook.
