About ASUS

ASUS, the world's top 3 consumer notebook vendor and the maker of the world's bestselling and most award winning motherboards, is a leading enterprise in the new digital era. ASUS designs and manufactures products that perfectly meet the needs of today's digital home, office and person, with a broad portfolio that includes motherboards, graphics cards, displays, desktop PCs, notebooks, servers, multimedia, wireless solutions, networking devices and mobile phones. ASUS has been rated No.1 in product reliability for notebook PCs by SquareTrade and Rescuecom in the United States, and is the fastest-growing of the top ten notebook brands in the world. Driven by innovation and committed to quality, ASUS won 3,398 awards in 2010, and is widely credited with revolutionizing the PC industry with the Eee PC™. With a global staff of more than ten thousand people and a world-class R&D team of 3,000 engineers, ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010".

ASUS Company Profile

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (2010), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 2 notebook brand in Central and Eastern Europe
- The Top 3 notebook brand in Western Europe
- The Top 4 notebook brand in Asia Pacific, excluding Japan

Asia Pacific

Europe

ASUS is the No. 1 Motherboard Brand in the World

- ASUS had shipped 260,000,000 motherboards since 1992
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard inside. The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS has the best quality & reliability notebooks.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No. 1 in Quality & Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the **Wall Street Journal Asia**.

ASUS received 3,398 Awards in 2010

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,398 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS - a Top 3 Global Consumer Notebook Brand

IT research firm International Data Corporation (IDC) recently revealed that ASUS has established itself as a **global top 3 consumer notebook brand**.

VENDOR	2010 (units)	RANK
Acer Group	25,371,000	1
HP	25,171,000	2
ASUS	13,535,000	3
Toshiba	12,930,000	4
Dell	12,751,000	5
Lenovo	8,721,000	6

Showing our strong brand recognition and trust, ASUS has been recognized as a top 3 global consumer notebook brand for four consecutive quarters, with almost 13.6 million units shipped during that time frame.

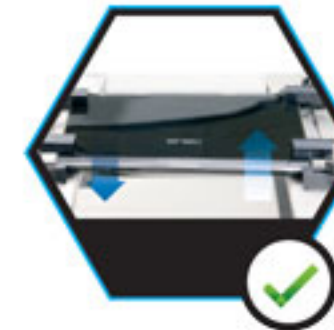

At ASUS, we aim to inspire and motivate. We continue to demonstrate our passion for technology and focus on quality to ensure that ASUS remains a global frontrunner in this new digital era. That is what Inspiring Innovation-Persistent Perfection is all about.

Extreme Testing for top-quality notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Twist test

Notebook lids opened with one hand can cause screens to flex. The twist test assesses how well notebooks cope with this type of handling by twisting the entire chassis to extreme degrees.

Shock test

Notebooks are likely to experience shocks during shipping and day-to-day use. So ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Vibration test

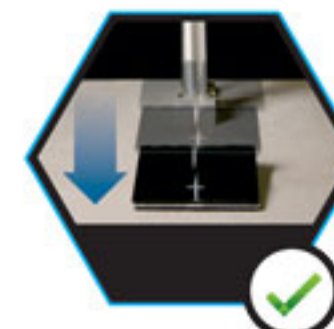

Shock is the one common laptop stress—vibration is another. The Vibration test subjects notebooks to a range of vibration frequencies to ensure that both the outer construction and internal components are able to cope.

Hinge test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness.

Drop test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its models through a series of drop tests that measure how well they cope with life's little accidents.

Pressure test

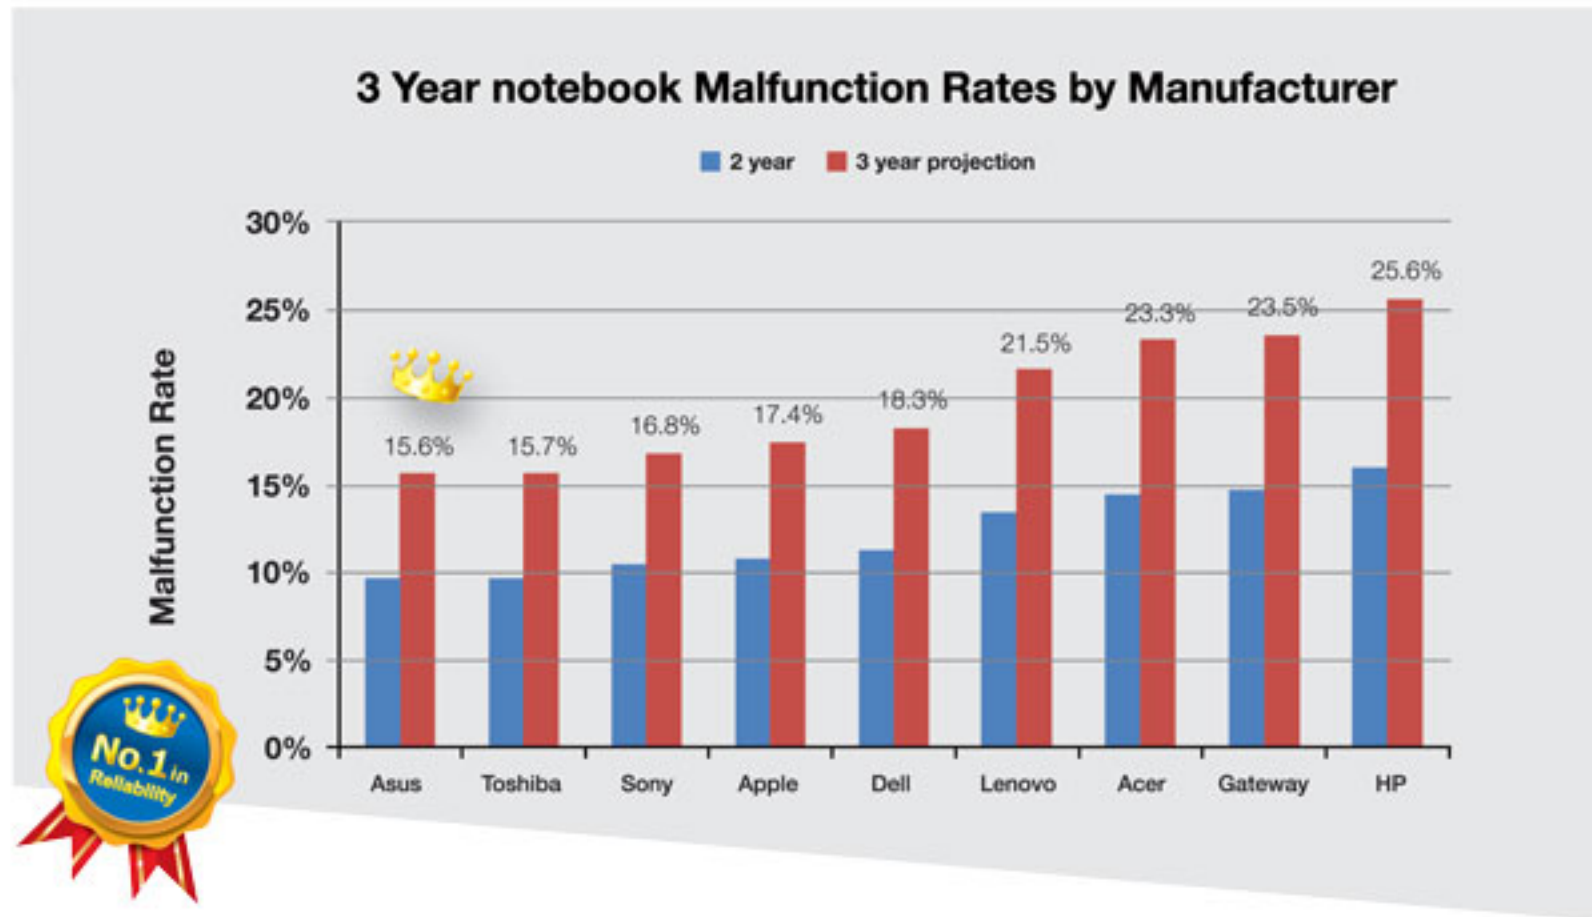

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests.

Survey of 30,000 notebooks lists ASUS as top of reliability ranking

In November 16th, 2009, SquareTrade, the largest independent warranty service provider in United States, published a report that analyzed the failure rates of over 30,000 new notebook computers manufactured by the leading 9 notebook brands over the past 3 years. A minimum of 1000 unit notebooks of each brand was sampled.

- According to this survey: “in terms of brands, ASUS stood out as the most reliable manufacturer. Acer, Gateway & HP had failure rates significantly higher than the average.”

With 3 years malfunction rates to be under 16%, notebooks from ASUS are nearly 40% more reliable than Hewlett-Packard, the worst performer in this study. The industry leader HP, which shipped nearly 16 million notebooks in the pass year according to IDC, ranked dead last in this reliability study with over one-fourth of notebooks expected to malfunction in 3 years. Gateway and Acer, the No.2 maker of notebooks, were also nearly unreliable as HP, with an expected malfunction rate of over 23%

ASUS Ranked No.1 in Reliability

Record-setting Score of 1791 in RESCUECOM's Computer Reliability Report Puts ASUS More than 1105 Points Ahead of Nearest Competitor

RESCUECOM, the industry-leading computer repair experts in the United States, assessed the world's top computer manufacturers according to the number of calls made to the RESCUECOM call centre vis-à-vis each company's market share, and ASUS far outshone the rest of the field with a disproportionately small number of calls requesting for help with its products. ASUS, the leader in PC innovation, quality and design, is now the clear leader in reliability as well, according to the latest RESCUECOM Computer Reliability Report released on August 30th, 2010.

ASUS was awarded a score of 1791—a RESCUECOM record—placing it emphatically at the top of the table and prompting RESCUECOM to dub ASUS the “new leader in reliable personal computers”.

“We are delighted with, but are not surprised by, this result,” said Cecilla HF, Director of Marketing, ASUS. “We have invested enormous resources in ensuring that our products are of the highest quality, and that our customers get the best after-sales service possible. We insist on perfection in everything we do—a philosophy that is captured in our new corporate slogan ‘Inspiring Innovation • Persistent Perfection’—and are very pleased to see our efforts reaping dividends in the form of a smooth customer experience.”

Position	Manufacturer	Reliability Score
1	ASUS	1791
2	APPLE	686
3	IBM/Lenovo	524
4	TOSHIBA	368
5	HP/COMPAQ	281
6	SONY	262
7	ACER	218

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

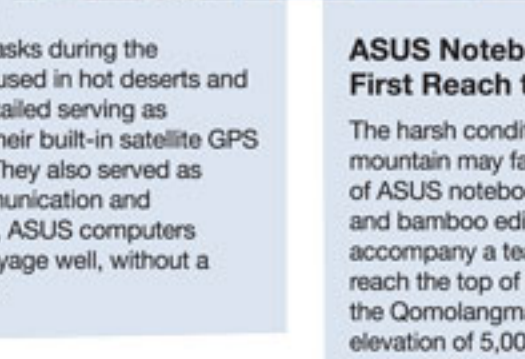

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

On the world's highest peak

ASUS Notebooks Are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

ASUS won 3398 awards in 2010

ASUS won four prestigious annual awards, Best 3D laptop, Best Entry Level Laptop, and Best CULV laptop and Best Netbook, by public vote in What's Laptop Magazine in the UK.

ASUS won "2010 Readers' choice" in PC Magazine and "2010 Tech Brand You Can Trust" in PCWorld in the United States; both awards are by public vote.

Visibly smart performance with a boost

ASUS won Best PC & Laptop Manufacturer of the year 2010 by Customer PC Magazine in the UK.

ASUS Product Awards in 2010

A Testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,398 awards from prestigious technology organizations and IT journalists worldwide.

ASUS U43 Bamboo Series
CHIP AUGUST 2010 : Review
"Beautiful, natural aesthetics Solid specs"

"Ultra-slim, thin-and-light netbook with a ton of features."
CHIP SEPTEMBER 2010 : Test Lab
"Slim, sleek design. Good overall performance"

ASUS Pick-Up & Return Service at Your Door Step

Still finding a nearest Service Center? Or too busy to send over your notebook to a particular Service Center?

Now, ASUS provide an exclusive solution for you! Other than 2 years Global Warranty, ASUS also provide a premium **PICK UP & RETURN SERVICE** for end users & dealers.

Pick up & return service allows end users to request for door-to-door pick up service or you may just drop your notebook/Eee PC to your nearest dealers.

While for dealers, a simple call/email will instantly get a specialist to pick up the notebook/Eee PC from your outlet in order to save your time and human resources. In terms of pick up lead time, we can provide earliest of 1 day and latest of 4 days to assure the quality of our service.

There are only 5 simple steps to apply ASUS Pick UP and Return service.

How to apply Pick Up & Return Service?

- (1) Call/Email to request Pick Up & Return Service, Tel : 03-2145 6787, email address : asusmy@streamyx.com
- (2) Reply email for Service and your detail verification.
- (3) Print out the docket from the e-mail.
- (4) Stick the docket on the NB or EeePC cartons.
- (5) Wait for the courier to pick up.

Terms and Conditions:

- (1) The Pick-Up & Return service applies to ASUS Notebook and Eee PC only.
- (2) The Pick-Up & Return service for defective unit within warranty period will be free of charge.
- (3) Out-of-warranty, non-defective or customer-induced damage units are not covered by Pick-Up & Return service. In such cases, dealer or end user needs to carry in for repair.
- (4) Pick-Up & Return service only applies to RMA repairs and does not apply to DOA claims.
- (5) Any Location/City/Town not falling in any zone listed in zone table will be considered non-service area. Any shipment to non-service area is subjected to additional service rate or charge. (refer page 15 for zone table)
- (6) Additional service charge is applicable for delivery to any Island (e.g. Langkawi, Redang, Pangkor and etc) except Penang Island.

Information Required When Submitting Pick up & Return service request:

- (1) Dealer full company name/End User Name.
- (2) Contact person, phone number and email address.
- (3) Shipping Address
- (4) Product serial numbers
- (5) Product Symptom description

Global 2-year warranty

ASUS offers Consumers 2-year INTERNATIONAL warranty on Notebooks

Unlike brands that promise multiple years of product warranty but charge users components and repair fees after the first year, ASUS 2-year Global warranty is applicable both domestic and international in **59 countries**. By providing a real warranty to protect your purchases, ASUS demonstrates confidence in its ability to offer unrivaled quality wherever you may go. Eee PC netbooks are covered for 1 year global warranty.

Eee PC™ 1015PW

10.1" A Dual-Core Netbook Affords More Versatility

FEEL THE RUSH

Experience a new style of speed with the ASUS-Automobili Lamborghini VX7

VX7 a new style of speed

Ultra-luxe design inspired by the world-famous Italian supercars meets ASUS technological excellence. It's our most powerful notebook to date, ready to take you for a ride.

Flagship Power

Leading the exclusive ASUS-Automobili Lamborghini joint-venture series, the VX7 drives computing excitement like never before, fully-loaded with the newest technology and breathtaking power for your multimedia, gaming and productivity. Plus, it's downright sexy!

Looks Stunning

Taking design cues from the Automobili Lamborghini Gallardo and Murcielago LP640, the VX7 retains their aerodynamic and aggressive stance for a style that stands out from the crowd. Expect people to notice. Premium materials, sleek textures and bold colors complete this notebook, revving up your high-octane computing.

ASUS recommends Windows® 7.

Packed with Tech

When you get your hands on the VX7 with Genuine Windows® 7 Home Premium, you're assured performance that races past the competition. This is the crème de la crème of portable PCs.

All new Intel® 2nd generation Core™ i7 processors propel computing with extreme quad-core performance for better HD multimedia and multitasking so you get more done – faster.

NVIDIA® GeForce™ GTX 460M graphics with giant 3GB video memory set the stage for high res gaming and none of the compromise lesser notebooks force on you. This is the real deal.

Up to 16GB DDR3 main memory ensure a grand touring experience of smooth performance and better output in every application.

USB 3.0
10X Faster Than USB 2.0

New super-speed USB 3.0 runs up to ten times faster than USB 2.0, an ideal fit for your HD content and files.

Visibly smart performance at its best

ASUS N Series Hear the Power Feel the Power

Audio by Bang & Olufsen ICEpower®

Exclusive Feature:

ASUS SonicMaster Technology

Elevate your aural experience with SonicMaster technology, developed with the experience of Bang & Olufsen ICEpower®

USB 3.0

Transfers data and HD multimedia content up to 10X faster than USB 2.0 for speedier file sharing and data backups. (only on N53SN-SX043V)

ASUS Super Hybrid Engine

With ASUS Super Hybrid Engine Technology, the battery life can extend for up to **10 hours**** for all-day mobile computing

SonicMaster Composes New Notebook Audio Standard

Contemporary users utilize diverse applications, from precision productivity to high definition entertainment and gaming. Expectations run high and traditionally compromised notebook audio performance simply doesn't suffice—this resulted in development of the N Series from ASUS, once again revolutionizing the multi-role nature of notebooks with professional multimedia and hardware.

SonicMaster gains from the expertise of both the audio professionals at the ASUS Golden Ear Team and the respected experience garnered by Bang & Olufsen SonicMaster gains from the expertise of both the audio professionals at the ASUS Golden Ear Team and the respected experience garnered by Bang & Olufsen ICEpower®. It's not a one-off, nor a gimmick, presenting a new professional audio certification program, with SonicMaster-compliant notebooks guaranteeing consumers breathtaking sound.

SonicMaster delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Distinct vocals

Vocal performance on SonicMaster notebooks sound uncannily concert-like, as if transporting listeners to a live show.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like stand-alone hi-fi systems.

Lifelike surround

Implementing the latest codes, SonicMaster brings a 3D feel to movies and games.

Powerful graphics

Select N Series notebooks ship with the latest NVIDIA GeForce mobile solutions on board, pushing exciting performance in games, high def video, and more. These graphics engines ensure high resolutions and smooth video throughout, while remaining energy efficient to promote longer battery life and usability.

The 100% zero-dot-guaranteed LED screens that ship with the new N Series make the most of ASUS Video Magic image enhancement. This unique tool upscales DVD playback up to full HD. It also supervises GPU computing for greater output during intense multitasking, and works together with ASUS Splendid HD to balance color, brightness and contrast for constant viewing pleasure.

ASUS U Series

U36 : The world's thinnest 19mm notebook with Intel standard voltage CPU

In today's world, more of our daily computing is done on the move, and notebooks have become an essential part of our lives. In the past, having a notebook that was thin and lightweight meant sacrificing performance. Not anymore.

Introducing the ASUS U36, the world's first 19mm thin notebook with an Intel® standard voltage CPU. Along with ASUS Super Hybrid Engine technology giving a boost in performance when needed, the U36 offers the absolute best combination of performance for the size. With the U36 weighing in at a mere **1.66kg**, it is also the lightest notebook with a standard voltage CPU, challenging the way you think about lightweight notebooks.

Exclusive Feature:

Intel i5 Core Inside
Intelligently and automatically accelerates performance so you can enjoy the maximum possible speed

19mm thin notebook
The ASUS U36 is astonishingly sleek, coming in at 19mm thick for the best in ultra-portable design

ASUS Super Hybrid Engine
With ASUS Super Hybrid Engine Technology, the battery life can extend for up to **10+ hours**** for all-day mobile computing

Nanometer Coating
Easy to clean and a finger print-free with soft silk touch (U36 only)

Super light Material
u36 highly durable magnesium-aluminum alloy cover to reduce the weight & make it harder

ASUS recommends Windows® 7.

Exclusive thermal technology

Like humans, the harder a computer works, the hotter its internal temperature gets. The problem with pushing a computer to the limits is the amount of heat it generates and how to get rid of it. With the U36, ASUS engineers tackled this problem by developing exclusive thermal technology to keep not only the system cooler, but the palm rest area as well. Using dual lightweight heat pipes and an efficiently-designed layout, heat is transferred away from the palm rest for a more comfortable user experience.

Stylish design with MG-AL alloy cover case and silky nanometer coating

The U36 features a **super lightweight**, yet highly durable **magnesium-aluminum alloy cover** that can handle the rigors of being transported around all day, yet still looks refined and distinguished. An easy to clean silky nanometer coating on the palm rests helps ease the stress of extended workdays while keeping the notebook looking clean by repelling fingerprints and dirt.

ASUS Super Hybrid Engine for an incredible 10+ hours battery life

U Series lasts an incredible.

While the U36 may feature a standard voltage CPU and a powerful GPU, that doesn't mean the battery drains quickly. Thanks to **ASUS' Super Hybrid Engine**, the "Battery Saving" mode intuitively reduces notebook power consumption based on usage for extended battery life. Coupled with NVIDIA® Optimus™ technology, the

Visibly smart performance with a boost

ASUS recommends Windows® 7.

Visibly smart performance with a boost

IceCool Technology Keeps Your Hands Cool

IceCool Technology makes your PC experience cool and comfortable even during the longest computing sessions. Exclusive dual-sided motherboard design places hot components on the underside and away from users. Combined with heat pipes and vents, palm rests and typing surfaces stay cooler.

Palm Proof Technology Prevents Accidental Input

Intelligent touchpad distinguishes between palm and finger contact to prevent inadvertent cursor movements during typing.

IF Award-winning Ergonomic Chiclet Keyboard

Extra-wide dust-repellent keys stay comfortable even during extended typing sessions for improved productivity and interaction.

ASUS X42 Series

Set Your Own Rule Style, Color, Performance

ASUS X42 notebooks create a rainbow of enjoyment and productivity with the power of new Intel Core processors and discrete graphics. Whether for work or enjoyment, they have the performance you demand. Plus, advanced ergonomics and award-winning keyboards make getting more out of these chic notebooks easy and fun.

ASUS Feature:

Palm Proof Technology

Automatic detection that intelligently distinguishes your palm and finger. Touch pad will be automatically disabled when touched by your palm area that helps to prevent typing errors.

Smart Power Manager

Power4Gear manages power allocation and usage according to the user preferences in relation to the current task they need to perform.

Chiclet keyboard

The chiclet keyboard features wide anti-dust keys that provide a comfortable feel even after extended periods of typing.

A Truly Cinematic Experience

The X series delivers crisp and clear Full HD visuals through a 16:9, 14-inch LED-backlit display. When paired with audio from its Altec Lansing® Speakers with SRS Premium Sound™, it delivers a truly cinematic entertainment experience.

Power4Gear

Power4Gear power management system has four selectable modes to extend battery life.
