ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989.
 - One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard inside.
- The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS has the best quality & reliability notebooks.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality & Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the **Wall Street Journal Asia**.

ASUS received 3,886 Awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

*According to IDC definition Asia Pacific countries excluding Japan and China.

ASUS Now Southeast Asia's Second Biggest Notebook Brand

Due to consumer trust in ASUS quality and innovative designs, the company has become one of the regional top two notebook brands based on 2011 whole-year performance

ASUS celebrates another year of business excellence in 2011. Achieving a 145% growth rate last year, ASUS is the only PC brand to display strong expansion for 12 consecutive quarters, despite prominent seasonal factors and a tough global macro-economic landscape with deep impact on Southeast Asia markets and consumption.

According to IDC's whole-year 2011 rankings, ASUS has become one of the top two notebook brands in Southeast Asia.

Commenting on this, Rex Lee, Regional Director of Southeast Asia for ASUS, said:

“New ideas and technologies pave the way for success”

“ASUS greatly appreciates the recognition we and our products receive from consumers, and would like to thank all channel partners for their great support. We will continue to provide the best quality products through consistent innovation and persistent perfection.”

Rex Lee, Regional Director of Southeast Asia

Survey of 30,000 notebooks lists ASUS as top of reliability ranking

On November 16th, 2009, SquareTrade, the largest independent warranty service provider in United States, published a report that analyzed the failure rates of over 30,000 new notebook computers manufactured by the leading 9 notebook brands over the past 3 years. A minimum of 1000 unit notebooks of each brand was sampled.

■ According to this survey, ASUS laptops failed just over half as frequently as HP, which makes them a solid bet in terms of reliability (page 7).

With 3 years malfunction rates to be under 16%, notebooks from ASUS are nearly 40% more reliable than Hewlett-Packard, the worst performer in this study. The industry leader HP, which shipped nearly 16 million notebooks in the pass year according to IDC, ranked dead last in this reliability study with over one-fourth of notebooks expected to malfunction in 3 years. Gateway and Acer, the No.2 maker of notebooks, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (page 6).

SquareTrade Report disclaimer:
 - As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis.
 - Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data.
 - We did not take into consideration purchase location.

Extreme Test Ensure TOP-QUALITY notebooks

Take a look at what makes ASUS notebooks the most trustworthy in the business. If we listed every test and step our engineers actually use to make sure you get the best notebooks possible, this would go on forever — so consider this a taste!

Express yourself confidently thanks to keyboard durability tests, where special robots punch each key to check its feedback and stability even in the face of some brutal input!

Riding on bumpy roads, some PCs may start falling apart. Not ASUS notebooks. Harsh vibration testing ensures parts stay put and performance remains consistent even when the shaking starts!

❖ Abrasive resistance testing subjects ASUS notebook exteriors to friction, indicating colors and surface materials stay at prime condition even after extensive and demanding use.

❖ Abrasive noise tests check for loud fans, storage, even power delivery buzz, hushing them to create quiet notebooks. The entire chassis then passes audio tuning to deliver the best sound possible.

❖ Premium panels must handle limited spaces such as suitcases, and allow you to touch them without causing damage or distortion, so panel pressure testing ensures ASUS notebooks only use the best.

❖ Notebook lid hinges are weak spots. Use cheap materials and they'll snap. Vigorous hinge testing conducts thousands of open/close cycles, making sure hinges last the life of your notebook.

❖ Shock testing takes notebooks and simulates incidents that occur during shipping. With a big smile on their face, engineers make sure the notebooks survive these with no performance penalty.

❖ Twist testing checks chassis rigidity. Grabbing the notebook with one hand? No problem, this trial checks for uneven twist force endurance to give you the flexibility you need.

❖ Halt testing stands for « Highly Accelerated Life Test », and expresses moves notebooks through their typical life cycle to ferret out problems, with extensive analysis conducted by engineers.

❖ Port testing ascertains contacts and plugs are solid for frequent plugging/unplugging and can handle cable quality variations without data transfer and fidelity degradation.

❖ Tough temperature tests verify diverse operating conditions, from every low temperatures to high heat, including humidity for accurate results. Whatever the mercury shows, ASUS notebooks can take it.

❖ Drop testing proves notebook free fall resistance. ASUS quality means notebooks handle drops with no damage to internal components or external design, far beyond industry standards.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

On the world's highest peak

ASUS Notebooks Are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

ASUS won 3886 awards in 2011

Driven by our innovation approach for consistent perfection of design and performance had garnered us a total of 3,886 awards worldwide in 2011.

iF Design Awards

ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the **iF Design Awards 2012**.

INNOVATIONS International CES Awards

Six ASUS products have been selected for the **CES 2012 Innovations Design and Engineering Awards honoree program**. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation • Persistent Perfection has resulted in such wide recognition for our products.

ASUS Master the Six Elements of Better Sound

Six good reasons to choose a notebook with ASUS SonicMaster Technology

1. Better sound processing ensures crystal clarity
SonicMaster uses sound processing approved to Bang & Olufsen ICEpower standards, considered the best and most professional in the audio industry. Such high quality guarantees maximized clarity and minimized noise.

2. Wide sound frequency captures every note
Faithful reproduction delivers the most complete audio range available on any notebook PC, so no matter the source, SonicMaster renders it naturally with superior fidelity.

3. Large speakers produce impressive bass
SonicMaster-certified notebooks use oversized speaker chambers up to a massive 108cc, much bigger than the norm for a notebook. This means truly impactful bass reproduction and deeply resonating sound.

4. Powerful volume brings sound to life
Doing away with the tinny output of traditional notebooks, SonicMaster fields super-charged amplifiers driven by a dedicated power supply. This results in impressive volume control and consistently peerless sound quality.

5. Focus on vocals
The advanced sound processing applied in SonicMaster dynamically fine-tunes audio sources to bring out lifelike human voice, so every lyric stands out.

6. Living surround
With its active reshaping of sound waves and expanded frequency spectrum, SonicMaster has the power and responsiveness to create an immersive sound field of great spatial accuracy. Listeners are enveloped by pristine audio.

ASUS ZENBOOK™ IN SEARCH OF INCREDIBLE

Singularly impactful beauty

Setting new standards in technology and fashion, ZENBOOK Prime measures just 3mm front and 9mm

CHIP JUNE 2012: Test Lab "Excellent screen, improved keyboard, solid performance, amazingly thin"

back. It uses precision-crafted aluminum throughout its monoshell build, ensuring light durability. The cover features finely-etched concentric circles that embody the

infinite nature of Zen thinking, and the entire design has been optimized to offer a holistic approach towards combining beauty with speed. To maintain this look and feel, ASUS has developed a lineup of ZENBOOK Prime accessories that are just as attractive and sophisticated.

Trend-setting speed and power

ASUS engineering has been able to accomplish the feat of bestowing ZENBOOK Prime with uncompromising technical excellence despite its ultra-suave and compact form. Up to 3rd generation Intel®

Core i7™ processors (Ivy Bridge platform) are at the heart, while **Genuine Windows® 7 Home Premium (64-bit)** and **SATA 6Gb/s SSD storage** outpaces normal hard drives by up to four times. Similarly, **USB 3.0** ensures data moves up to ten times faster than USB 2.0, and **Bluetooth 4.0** offers the latest version of the wireless connectivity standard. **Dual band 2.4GHz/5GHz Wi-Fi** derived from top-end ASUS router technology ensures the fastest networking, and to keep all of this cool, a proprietary V-shaped air channel drives heat away before it can cause instability.

The art of entertainment

ZENBOOK Prime fields a vivid **full HD 1080p IPS panel** that brings visuals to breathtaking life with **350cd/m2 brightness and 800:1 contrast**. Its anti-glare materials reduce distracting reflections and unsightly fingerprints, while **IPS technology affords wide 178° viewing angles** so more people can look on with better quality from almost any direction. Even in the dark, ZENBOOK Prime shines, using a high-comfort backlit keyboard so you can keep typing and

enjoying without disturbing others. And for face to face communications, the built-in HD camera does your conversations great justice.

To complement its superior visual finesse, ZENBOOK Prime includes exclusive ASUS SonicMaster audio technology, developed together with **Bang & Olufsen ICEpower®**. Sharper high notes, clearer vocals, deeper bass, and a wider sound range all impress, completing a remarkably attractive portable multimedia package.

ASUS ZENBOOK™ - The Incredible Ultrabook™ Do you believe in love at first sight?

ASUS ZENBOOK™ is an exercise in philosophy, epitomizing tranquility that seamlessly integrates with the lives of users. It is an initiative to fuse beauty, strength and stability in pure unison, built on new values, and evolved for a new age where finding what's truly important in our lives is more vital than ever.

Incredible Responsiveness: Smartphone-like experiences with 2-week standby time

One of the key advantages of the ASUS ZENBOOK™ is its smartphone-like spontaneity and always-on design. Regardless of how long the Ultrabook™ remains in it can standby, resume in just **two seconds** thanks to exclusive **ASUS Super Hybrid Engine II technology**. In effect, this means

users have no reason to shut the ASUS ZENBOOK™ down, eliminating the need for lengthy boot ups. And with exclusive **ASUS Super Hybrid Engine II technology**, the ASUS ZENBOOK™ can stay in standby for **up to two weeks**. Instant on functionality automatically

backs up data to the SSD should the battery level drop **below 5%**, removing the risk of data loss due to a drained battery. The ZENBOOK™ therefore adds worry-free usability to its list of advantages.

ASUS New N Series

Hear the incredible, feel the power

Audio by Bang & Olufsen ICEpower®

ASUS N Series notebooks represent an entirely new standard in ASUS design thinking towards delivering greater customer happiness. They feature a focus on attractive design and aesthetic appeal alongside the finest professional-grade audio offered on notebook PC. They also give consumers improved and highly intuitive touch input that has been engineered to ensure greater accuracy, and an optional backlit keyboard purpose-built to provide complete convenience. All of these components are part and parcel of ASUS DNA and design thinking.

Wider and more vivid views

All new N Series notebooks feature advanced wide-view panels that provide 150° horizontal by 120° vertical angles. These allow for better shared viewing of content by several people, and mean image quality remains uncompromised from almost any direction. Every panel offers at least 720p HD, and optional panels support full HD 1080p for even finer image quality with improved clarity, brightness, and contrast.

Powerful performance with an always on and always connected experience

Tap into the smoothness and spontaneity of true 2-second instant on resume with ASUS Super Hybrid Engine II technology, giving N Series notebooks smartphone-like immediacy. Coupled with the might of 3rd generation Intel® Core™ processors and the convenience of exclusive USB Charger+ quick device charging, the N Series embodies portable power.

Elegant, luxurious design

reddot design award winner 2012

Although brand new, N Series notebooks have already secured a coveted 2012 reddot design award for their attention to stylish materials and design considerations. They offer consumers an attractive hairline-etched metallic cover with an illuminated ASUS logo for added impact, plus a unique ripple-effect speaker mesh that signifies the flow of sound provided by SonicMaster Premium.

SonicMaster Premium delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like stand-alone hi-fi systems.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Lifelike surround

Implementing the latest codes, SonicMaster brings a 3D feel to movies and games.

Distinct vocals

Vocal performance on SonicMaster notebooks sound uncannily concert-like, as if transporting listeners to a live show.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

ASUS G Series 3D

THE ULTIMATE FIGHTING MACHINE

Inspired by the stealth fighter, the G Series regains superiority over the competition with advanced design and battle-hardened build quality. The soft, sleek but muscular lines will allow you to outmaneuver and dominate ungainly competitors, while the advanced thermals and gamer friendly design will keep you immersed in the truly 3D gaming experience for longer.

■ Uncompromised Performance

There's a new emperor ruling the world of mobile gaming. The G Series breaks new performance barriers with the uncompromising power of a third generation Intel® Core™ i7 CPU and an NVIDIA® GeForce® GTX 660M/670M GPU with 2GB/3GB of GDDR5 VRAM. The G Series establishes itself as the fastest notebook in the land and will not only feed amazing gaming experiences today, but is primed to continue delivering them for years to come. It also includes support for 2 second instant on when equipped with an SSH or SSD hard drive, meaning you no longer have to wait to frag.

■ Incredible 3D Experiences

The G Series is already destined to become one of the true greats in the world of mobile gaming, but with support for NVIDIA® 3D Vision™ 2, including 3D Active Shutter and 3D LightBoost technology, its place on the hall-of-fame is virtually guaranteed. Games, photos and movies can be experienced like never before – in Full HD and true 3D!

■ An Intense Audio/Visual Feast

Eye strain will be a thing of the past with the G Series's matt finish anti-glare display, while the wide viewing angle reduces the dead zone and helps to improve visibility during gaming – particularly in dark environments. The built-in subwoofer, complete with SonicMaster audio technology ensures a rich and powerful experience that will ward off challengers.

■ Incredible Thermal Efficiency

The G75VW packs a massive performance punch, which needs to be kept cool – the dual fan filter system enables you to keep your system running cooler and quieter, for longer. The unique, intelligent thermal design improves power and thermal efficiency by exhausting hot air from the back of the machine, enabling you to leave the competition battling for survival in your wake.

Exclusive Feature:

Extreme Performance

A Blisteringly fast Intel® 3rd Generation Core™ i7 CPU

Realistic 3D Experience

The latest NVIDIA® GeForce™ GTX graphics with Active Shutter 3D Technology.

Intelligent Cooling

Dual fan exhausts and efficient thermal design.

ASUS New A Series Dive Into Colorful Living

Stand out from a sea of mediocrity with the ASUS A Series. Available in red, blue, white, smoky black or dark indigo, its streamlined aluminum lines deliver a luxurious, premium feel. The A Series delivers uncompromised performance with the **3rd generation Intel® Core™ i5 processor, Windows® 7 Home Premium, NVIDIA® GeForce® 600 Series graphics processor**. In addition, the **ASUS Super Hybrid Engine II technology** increases energy efficiency and gives the **A Series instant on 2-second resume capabilities**. Put those together with **ASUS SonicMaster Lite technology** and the A Series provides an immersive multimedia experience. Other user-centric innovations include IceCool Technology which keeps the palm rests cool, and SuperBatt Technology that triples the battery charge-cycle lifespan when compared to other batteries.

Exclusive Features:

Sheer Processing Power

ASUS A Series notebooks feature the 3rd Gen Intel® Core™ processors, boosting graphics and multitasking performance and putting you in charge of smoother computing

SonicMaster Lite

Exclusive ASUS audio technology enhances multimedia enjoyment with clearer, more powerful sound in every application

SuperBatt Technology

Unique battery design on ASUS notebooks extends recharge cycle longevity by up to 3X

IceCool Technology

Palm rests are kept below the average temperature of the human body, even after long hours of computing

Refined beauty by design

The ASUS A series features an aluminum construction and comes in luxurious smoky brown and dark indigo colors. It features a sleek, wedge-shaped design with a textured finish.

Keeping computing cool and easy

The A Series has an array of features designed to make computing easier. It features an ergonomically-designed iF Design award winning chiclet keyboard; while IceCool Technology places heat-generating components away from the palm rest, ensuring a comfortable typing experience for users even after prolonged periods of use.

It is accompanied by a large multi-touch pad for smooth, intuitive fingertip control. ASUS SuperBatt Technology provides an extended battery charge-cycle lifespan that is up to 3x that of normal notebooks.

Computing with a smartphone-like user experience

The A Series features a smartphone-like "always on" user experience thanks to the **ASUS Super Hybrid Engine II with instant on technology**. It enables the A Series to resume from sleep mode in just 2-seconds, and provides up to two weeks of standby time. In addition, it automatically secures and backs up data when the battery drops to 5% charge.

Amazing audio

ASUS SonicMaster Lite gives the ASUS A Series the ability to deliver more powerful sounds and richer bass to provide the best audio experience in the mainstream notebook class.

CHIP APRIL 2012: Test Lab
"Very affordable
Performs very well"

Exclusive Feature:

The ultra-thin and light design fits more technology into a compact form factor that's easy to carry and use. The slim bezel means a bigger screen can be attached to a more slender chassis, while the spun aluminum finish creates a very unique look.

*Subject to system configuration and/or usage.

Padfone™

Phone & Pad : Expand Your World.

Key to the ASUS Padfone™'s supreme versatility is the unique DynamicDisplay technology which allows a seamless transition between standalone and docked modes, where the majority of applications are automatically enhanced with their display layouts adjusted to suit the screen. A great example of DynamicDisplay in use is the email app. Users can connect the Padfone™ to the Padfone™ Station while halfway through typing and email, the app will automatically adjust to take advantage of the Padfone™ Station's 10.1" 1280 x 800 screen by displaying more information such as the list of emails in the inbox with a full view of an open email. The intelligent DynamicDisplay technology will also ensure that the app remembers where it stopped so that users can immediately continue playing that new game without having to start all over again when switching from Padfone™ to Padfone™ Station and vice versa

DynamicDisplay

Achieve more!

Extend the Padfone™'s talk time by up to 63 hours with the Padfone™ Station's built-in battery. Need even more power? Simply dock the Padfone™ into the bigger battery of the Station Dock to increase talk time by an amazing 102 hours!

Save more!

When docked, the Padfone™ Station uses the Padfone™'s 3G data connection for internet access, so just one SIM card and one mobile data contract can be shared between both devices.

Capture unforgettable images

An 8MP camera, back-illuminated CMOS sensor, large F2.2 aperture and 5-element lens allow for precise photography and HD 1080p video recording, even under low light conditions.

Be blown away by awesome audio

Tuned by ASUS audio specialists for an unforgettable audio experience, the Padfone™ delivers the most precise processing protocols and codecs to channel sound through superior quality speakers with large resonance chambers. **SonicMaster**

No more syncing with one stop storage!

The Padfone™ provides all of the Padfone™ Station's processing power and storage when the two are docked. So no matter which device you used last, all your photos, documents, and games are kept up to date and available whenever you need them on phone and pad.

Because design matters and we care

The concentric cycle finish found on the back of the Padfone™ and the Padfone™ Station is derived from the Zen concept and provides a comfortable grip.
