ASUS PRODUCT GUIDE

MARCH - APRIL 2012

Set sail with Jay IN SEARCH OF INCREDIBLE!

Exclaim your love for great music with ASUS N Series Jay Chou Mystic Edition notebooks, celebrating his latest album, Exclamation Point!

ASUS joins you with Jay for amazing songs like Sailor Fears Water, as he takes on everything from mermaids to sharks and even the kraken with exclusive ASUS features and extras!

- Powerful 2nd generation Intel® Core™ processors
- ASUS SonicMaster audio technology brings Jay to life on your new notebook
- Bundled with external subwoofer and classy sea white Jay signature mouse!

Time to get onboard with Jay and ASUS - happy voyaging!

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (Q4, 2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in China
- The Top 3 notebook brand in Western Europe
- The Top 4 notebook brand in Asia Pacific

Asia Pacific

Europe

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989.
 - One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard inside.
- The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS has the best quality & reliability notebooks.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality & Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the **Wall Street Journal Asia**.

ASUS received 3,886 Awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

*According to IDC definition Asia Pacific countries excluding Japan and China.

ASUS - a Top 3 Global Consumer Notebook Brand

IT research firm International Data Corporation (IDC) recently revealed that ASUS has established itself as a **global top 3 consumer notebook brand**.

VENDOR	RANK	UNITS (000)
HP	1	6,014
Acer Group	2	5,379
ASUS	3	4,817
Toshiba	4	3,686
Lenovo	5	3,568
Dell	6	3,485

Source: IDC Q4 2011 Historical Data, Worldwide CONSUMER Portable PC Shipments

Showing our strong brand recognition and trust, ASUS has been recognized as a top 3 global consumer notebook brand for two consecutive years, with around 30 million shipped during the time frame.

At ASUS, we aim to inspire and motivate. We continue to demonstrate our passion for technology and focus on quality to ensure that ASUS remains a global frontrunner in this new digital era. That is what Inspiring Innovation-Persistent Perfection is all about.

Extreme Testing for top-quality notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Twist test

Notebook lids opened with one hand can cause screens to flex. The twist test assesses how well notebooks cope with this type of handling by twisting the entire chassis to extreme degrees.

Shock test

Notebooks are likely to experience shocks during shipping and day-to-day use. So ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Vibration test

Shock is the one common laptop stress—vibration is another. The Vibration test subjects notebooks to a range of vibration frequencies to ensure that both the outer construction and internal components are able to cope.

Hinge test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness.

Drop test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its models through a series of drop tests that measure how well they cope with life's little accidents.

Pressure test

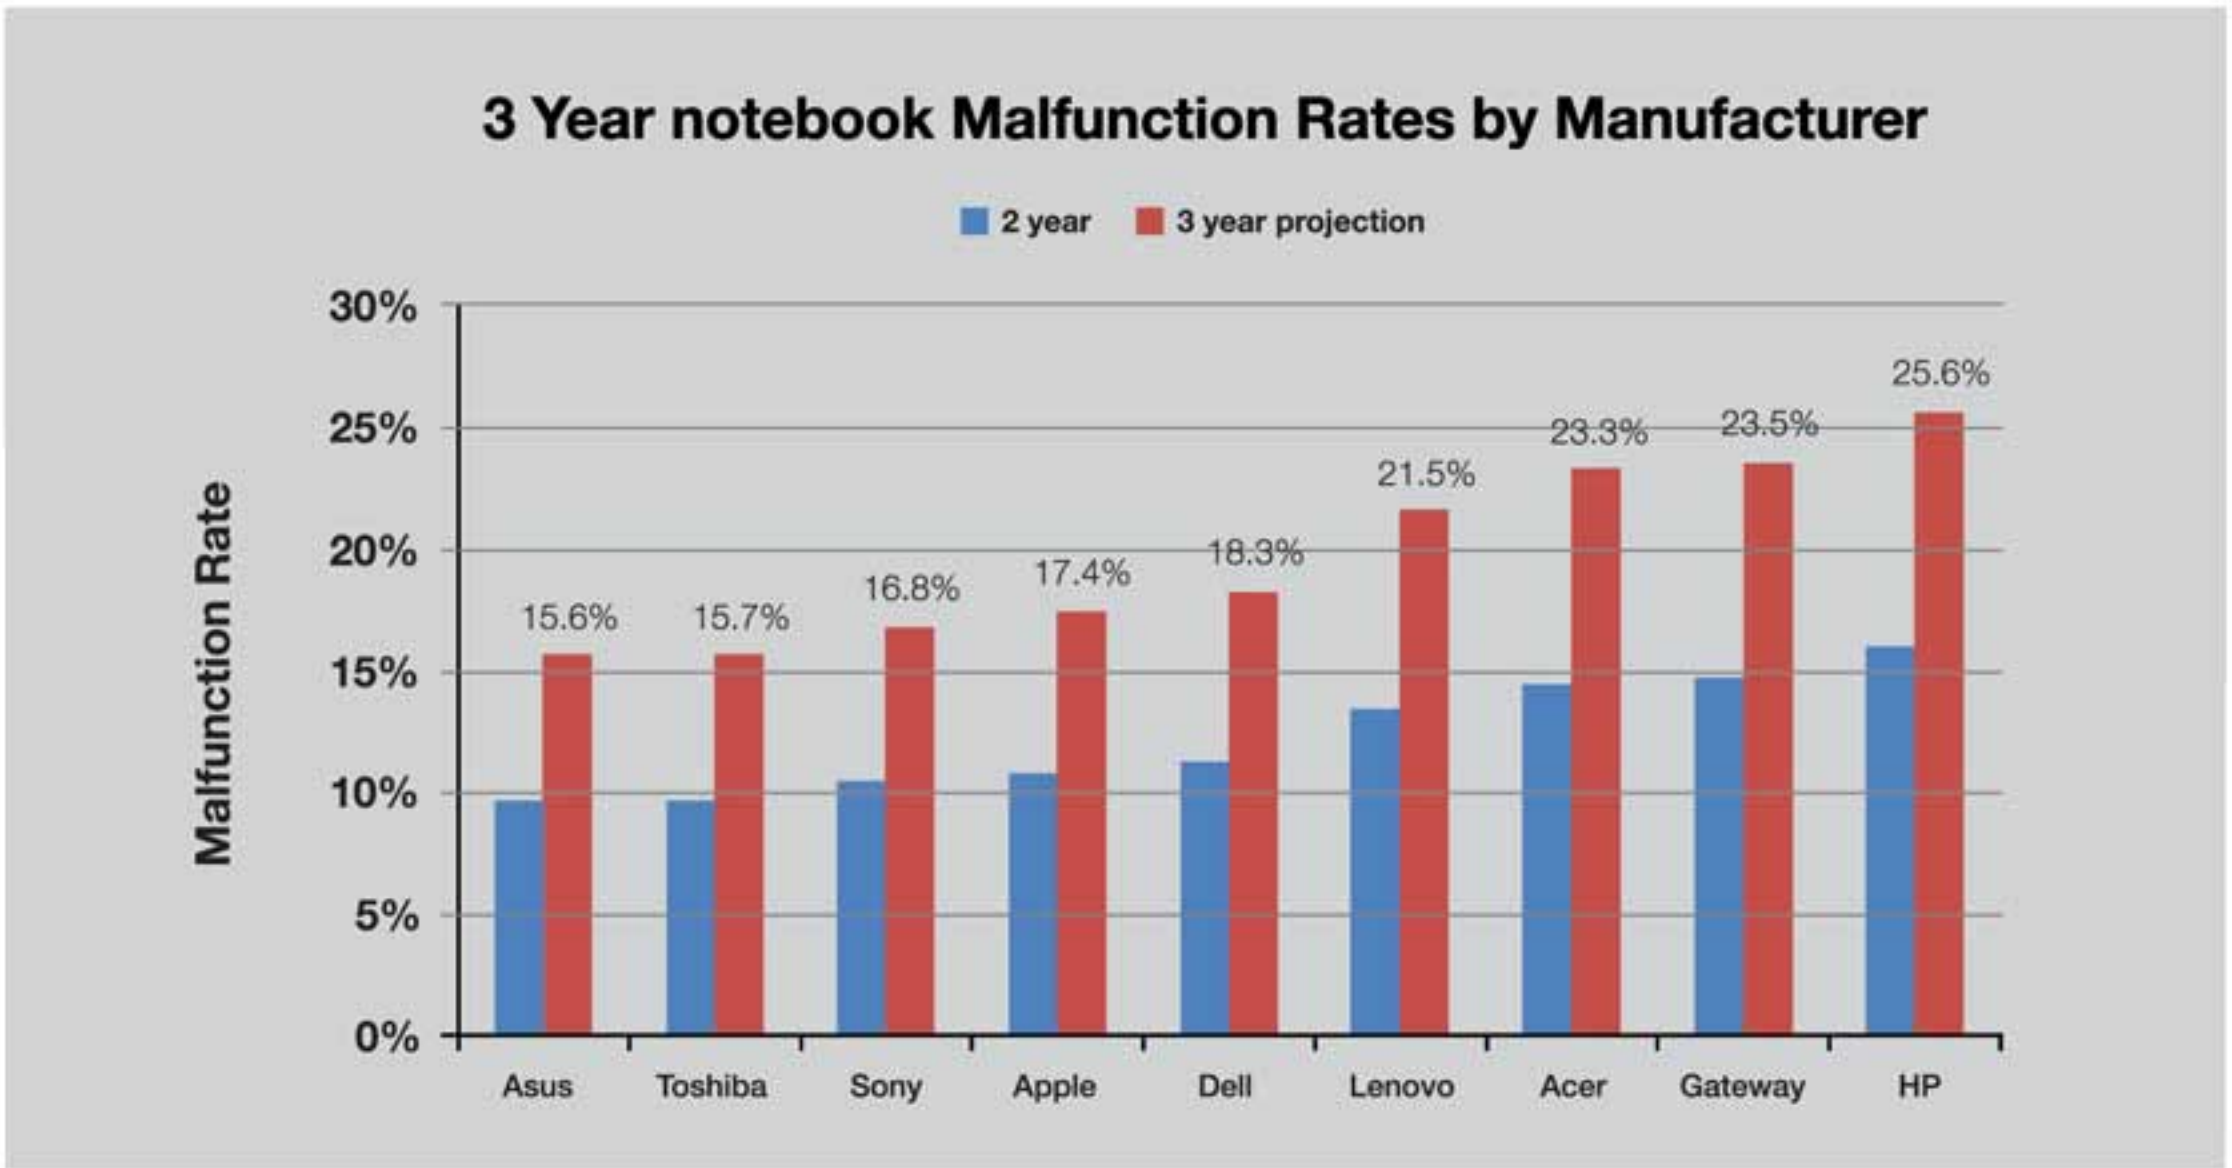

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests.

Survey of 30,000 notebooks lists ASUS as top of reliability ranking

On November 16th, 2009, SquareTrade, the largest independent warranty service provider in United States, published a report that analyzed the failure rates of over 30,000 new notebook computers manufactured by the leading 9 notebook brands over the past 3 years. A minimum of 1000 unit notebooks of each brand was sampled.

■ According to this survey, ASUS laptops failed just over half as frequency as HP, which makes them a solid bet in terms of reliability (page 7).

With 3 years malfunction rates to be under 16%, notebooks from ASUS are nearly 40% more reliable than Hewlett-Packard, the worst performer in this study. The industry leader HP, which shipped nearly 16 million notebooks in the pass year according to IDC, ranked dead last in this reliability study with over one-fourth of notebooks expected to malfunction in 3 years. Gateway and Acer, the No.2 maker of notebooks, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (page 6).

Source : <http://www.squaretrade.com/pages/laptop-reliability-1109/> SquareTrade, 2009/Nov/16th, Report "1 in 3 Laptops fail over 3 years"

SquareTrade Report disclaimer:
- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis.
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data.
- We did not take into consideration purchase location.
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied, about the data accuracy of the data.

ASUS Ranked No.1 in Reliability*

Record-setting Score of 1791 in RESCUECOM's Computer Reliability Report Puts ASUS More than 1105 Points Ahead of Nearest Competitor

RESCUECOM, the Industry-leading computer repair experts in the United States, assessed the world's top computer manufacturers according to the number of calls made to the RESCUECOM call centre vis-à-vis each company's market share, and ASUS far outshone the rest of the field with a disproportionately small number of calls requesting for help with its products. ASUS, the leader in PC innovation, quality and design, is now the clear leader in reliability as well, according to the 2010 2nd Quarter Computer Reliability Report released on August 30th, 2010.

ASUS was awarded a score of 1791—a RESCUECOM record—placing it emphatically at the top of the table and prompting RESCUECOM to dub ASUS the "a runaway winner".

"We are delighted with, but are not surprised by, this result," said Cecilla HF, Director of Marketing, ASUS. "We have invested enormous resources in ensuring that our products are of the highest quality, and that our customers get the best after-sales service possible. We insist on perfection in everything we do—a philosophy that is captured in our new corporate slogan 'Inspiring Innovation • Persistent Perfection'—and are very pleased to see our efforts reaping dividends in the form of a smooth customer experience."

Position	Manufacturer	Reliability Score**
1	ASUS	1791
2	APPLE	686
3	IBM/Lenovo	524
4	TOSHIBA	368
5	HP/COMPAQ	281
6	SONY	262
7	ACER	218

RESCUECOM, the leading repair service company in the United States

Source : <http://www.rescuecom.com/blog/index.php/computer-support/the-rescuecom-computer-reliability-report-2nd-quarter-2010>

*The RESCUECOM Reliability Report is based on two fundamentals: the quality of the computer and the quality of the support provided by the manufacturer.
**These reports are calculated in a simple and straight forward manner: the number of computers an individual manufacturer ships (and therefore their market share) is weighed against the number of calls Rescuecom's computer repair specialists receive for that same manufacturer.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

On the world's highest peak

ASUS Notebooks Are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

ASUS won 3886 awards in 2011

Driven by our innovation approach for consistent perfection of design and performance had garnered us a total of 3,886 awards worldwide in 2011.

iF Design Awards

ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.

INNOVATIONS International CES Awards

Six ASUS products have been selected for the CES 2012 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation • Persistent Perfection has resulted in such wide recognition for our products.

ASUS Pick-Up & Return Service at Your Door Step

Still finding a nearest Service Center? Or too busy to send over your notebook to a particular Service Center?

Now, ASUS provide an exclusive solution for you! Other than 2 years Global Warranty, ASUS also provide a premium **PICK UP & RETURN SERVICE** for end users & dealers.

Pick up & return service allows end users to request for door-to-door pick up service or you may just drop your notebook/Eee PC to your nearest dealers.

While for dealers, a simple call/email will instantly get a specialist to pick up the notebook/Eee PC from your outlet in order to save your time and human resources. In terms of pick up lead time, we can provide earliest of 1 day and latest of 4 days to assure the quality of our service.

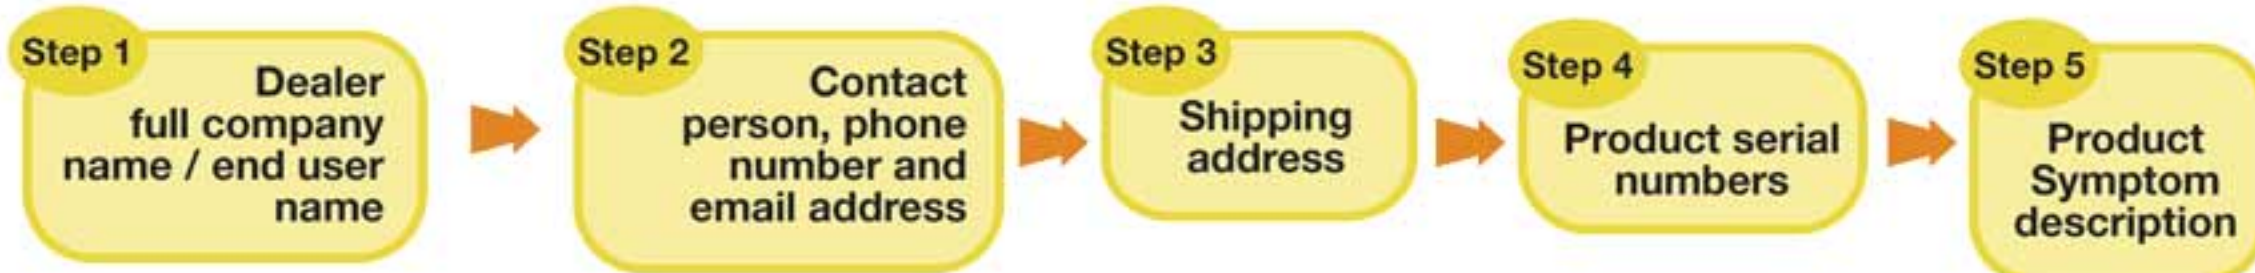

There are only 5 simple steps to apply ASUS Pick UP and Return service.

How to apply Pick Up & Return Service?

Information Required When Submitting Pick up & Return service request:

Terms and Conditions:

- (1) The Pick-Up & Return service applies to ASUS Notebook and Eee PC only.
- (2) The Pick-Up & Return service for defective unit within warranty period will be free of charge.
- (3) Out-of-warranty, non-defective or customer-induced damage units are not covered by Pick-Up & Return service. In such cases, dealer or end user needs to carry in for repair.
- (4) Pick-Up & Return service only applies to RMA repairs and does not apply to DOA claims.
- (5) Any Location/City/Town not falling in any zone listed in zone table will be considered non-service area. Any shipment to non-service area is subjected to additional service rate or charge. (refer page 15 for zone table)
- (6) Additional service charge is applicable for delivery to any Island (e.g. Langkawi, Redang, Pangkor and etc) except Penang Island.

ASUS Global 2 years warranty

ASUS offers Consumers 2 years INTERNATIONAL warranty on Notebooks

Unlike brands that promise multiple years of product warranty but charge users components and repair fees after the first year, ASUS 2 years Global warranty is applicable both domestic and international in **59 countries**. By providing a real warranty to protect your purchases, ASUS demonstrates confidence in its ability to offer unrivaled quality wherever you may go. Eee PC netbooks are covered for 1 year global warranty.

Do you know how much it will cost you to repair a notebook after the one year warranty?

If your notebook is broken after the one year warranty, you might need to spend **RM900 to RM1800** to repair your notebook. A reference repairing cost table from various notebook brands as below. Why not choose a notebook brand that comes with 2 years global warranty (*term and conditions apply) that cover components and repair fees? Asus gives you the peace of mind to protect your investment.

Comparison of Repair Cost (Out of warranty)

Brand	Costs	LCD is broken after 1 year of use	Motherboard is broken after 1 year of use	Memory is broken after 1 year of use	HDD is broken after 1 year of use
A Brand	Spare Part Replacement Cost (together with labor cost)	RM650 - RM700	RM700	Depend on market price	320GB - RM185 500GB - RM240
H Brand	Spare Part Replacement Cost (together with labor cost)	RM700 - RM900	RM800 - RM1000	2GB DDR2 - RM180 2GB DDR3 - RM200	320GB - N/A 500GB - RM450
T Brand	Spare Part Replacement Cost (together with labor cost)	RM1000	RM1000 - RM1200	RM200 - RM300	320GB - RM500 500GB - RM900

A Compelling Range

Notebooks that exceed your expectations

ASUS | PREMIUM Series

Ignite the might of the most powerful notebook ever from ASUS, the ultra-specced ASUS-AUTOMOBILI Lamborghini VX7 with its full HD 1080p 15.6 screen.

ASUS VX7
15.6" A new style of the speed

10.1" Social media machine

Technology Highlight

ASUS recommends Windows® 7.

ASUS Master the Six Elements of Better Sound

Six good reasons to choose a notebook with ASUS SonicMaster Technology

1. Better sound processing ensures crystal clarity

SonicMaster uses sound processing approved to Bang & Olufsen ICEpower standards, considered the best and most professional in the audio industry. Such high quality guarantees maximized clarity and minimized noise.

2. Wide sound frequency captures every note

Faithful reproduction delivers the most complete audio range available on any notebook PC, so no matter the source, SonicMaster renders it naturally with superior fidelity.

3. Large speakers produce impressive bass

SonicMaster-certified notebooks use oversized speaker chambers up to a massive 108cc, much bigger than the norm for a notebook. This means truly impactful bass reproduction and deeply resonating sound.

4. Powerful volume brings sound to life

Doing away with the tinny output of traditional notebooks, SonicMaster fields super-charged amplifiers driven by a dedicated power supply. This results in impressive volume control and consistently peerless sound quality.

5. Focus on vocals

The advanced sound processing applied in SonicMaster dynamically fine-tunes audio sources to bring out lifelike human voice, so every lyric stands out.

6. Living surround

With its active reshaping of sound waves and expanded frequency spectrum, SonicMaster has the power and responsiveness to create an immersive sound field of great spatial accuracy. Listeners are enveloped by pristine audio.

USB 3.0 - Faster than Ever Data Handling speed

USB 3.0 now comes standard with many ASUS notebooks. Here's how it makes life better and easier for mobile users. USB 3.0 enables dramatically faster data transfers. This new standard for 21st century computing is up to ten times faster than USB 2.0, ensuring vastly shorter wait times. Perfect timing for this age of high definition content and inflated file sizes.

USB 3.0 isn't the only thing that's fast

With its long track record for being first with new technology, it's no surprise that ASUS is the first notebook maker to incorporate fully-certified USB 3.0 into its products. So pick up an ASUS notebook with USB 3.0 today, and enter a new world of possibilities.

USB 3.0 offers faster recharge times

USB 3.0 charges compatible devices faster than USB 2.0. And although it is higher-powered, it is also more efficient, actually expending less energy during the charging process.

USB 3.0
10X Faster Than
USB 2.0

ASUS ZENBOOK™ - the incredible Ultrabook™

Do you believe in love at first sight?

ASUS ZENBOOK™ is an exercise in philosophy, epitomizing tranquility that seamlessly integrates with the lives of users. It is an initiative to fuse beauty, strength and stability in pure unison, built on new values, and evolved for a new age where finding what's truly important in our lives is more vital than ever.

Incredible beauty with durable aluminum spun metal finish

ASUS ZENBOOK™ achieves a unique combination of artistic craftsmanship and advanced technology. It arises from the efforts of a dedicated team of designers and engineers, working hard to deliver a portable PC that's eminently cool, stylish and powerful gifted with a harmony of great looks and potent features.

Incredible Responsiveness: Smartphone-like experiences with 2-week standby time

One of the key advantages of the ASUS ZENBOOK™ is its smartphone-like spontaneity and always-on design. Regardless of how long the Ultrabook™ remains in it can standby, resume in just **two seconds** thanks to exclusive **ASUS Super Hybrid**

Engine II technology. In effect, this means users have no reason to shut the ASUS ZENBOOK™ down, eliminating the need for lengthy boot ups. And with exclusive **ASUS Super Hybrid Engine II technology**, the ASUS ZENBOOK™ can stay in standby for **up to two weeks**. Instant on functionality automatically backs up data to the SSD should the battery level drop **below 5%**, removing the risk of data loss due to a drained battery. The ZENBOOK™ therefore adds worry-free usability to its list of advantages.

Incredible Performance with USB 3.0 and SATA 6Gb/s

ASUS is proud to deliver the world's first ultrabook with SATA 6Gb/s solid state storage, making for an amazingly smooth and fast computing experience. ASUS ZENBOOK™ models use an SSD for storage instead of a conventional mechanical hard drive. This reduces power consumption while expediting boot up, so users save time and energy. SSDs are also far less susceptible to failure and environmental hazards than traditional drives, making them better for portable use.

Incredible sound with ASUS SonicMaster Technology

Based on cooperation between the ASUS Golden Ear team and Bang & Olufsen ICEpower®, ASUS ZENBOOK™ outputs incredible audio that's the best among all Ultrabook™ in its class. Custom design includes an oval voice coil for clearer vocals, oversized shielded speaker magnets for more impact and better bass, plus aluminum rings to secure speakers and reduce vibration. This is further helped by ASUS ZENBOOK's aluminum body, which conducts and insulates sound very well at the same time. Lifelike audio via Smart Dynamic Range Control (DRC) means sheer sound enjoyment in every situation.

Incredible Green: Better Battery Life and Info

Dedicated Battery Saving Mode boosts battery charge by as much as 25% for longer usability and range, free from the need to stay close to wall sockets or adapters. So that you're always in the know when it comes to battery life, the exclusive ASUS PowerWiz utility provides accurate info on available charge by specific usage conditions, so you can plan better.

ASUS N Series

Jay Chou Mystic Edition

Audio by Bang & Olufsen ICEpower®

ASUS and bestselling multimedia artist Jay Chou work together again, following the successful N43SL limited edition, this time delivering the N45SL Jay Chou Mystic Edition. Inspired by Jay's new Exclamation Point album, the notebook brings his cool and breezy ideas to portable PCs. Memorable cover art includes characters featured in the Exclamation Point story, connecting you directly to Jay's vision. To maintain the thrill of ocean-going mysteries, ASUS designers have added a blue-streak side panel to the N45SL, setting it apart from other N Series models. It also comes with Jay's signature next to the keyboard for a personal touch.

Seafaring Adventure Cover inspired by the marine theme of Jay's new album Exclamation Point.

Jay Chou's signature

Special blue print keyboard with unique "!" key

Great Sight

As a true multimedia machine, the N45SL also assures you the finest visual enjoyment. It's fitted with exclusive ASUS Video Magic, an intelligent engine that improves video content with better colors and accuracy to provide upgraded viewing experiences. For web chatting and vlogging, the N45SL's HD camera works at up to 30 frames per second, twice smoother than standard notebook cameras (15 frames per second).

Exclusive Feature:

ASUS SonicMaster Technology

Elevate your aural experience with SonicMaster technology, developed with experience of Bang & Olufsen ICEpower®

Instant On

Have your PC always boot in just seconds for up to 20 days standby, while never risking the loss of your data.

Quick Charge. Even When Powered Off

USB 3.0 ports for Superspeed performance that's 10x faster than existing USB 2.0. Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off

Clear and Fluid Video Recording

The integrated HD camera is designed to provide crisp, clear and fluid video recording for video calls and conferencing or home movie creation, even in low-light situations

Listen up

Sound gets augmented by the fidelity of exclusive ASUS SonicMaster audio technology, co-created with the experts at Bang & Olufsen ICEpower® to deliver pristine sonic quality. Jay has never sounded so good on notebook PC, with every detail coming out in full. We're bundling an external subwoofer with the N45SL to give you truly deep and impactful bass, thanks to the precision of SonicMaster.

All-round faster performance

To avoid annoying waits, the N45SL ships with ASUS true **instant on 2-second resume from standby mode**, giving you smartphone-like spontaneity. Continuing the notion of speed, **USB 3.0 works up to ten times faster than USB 2.0**, while the power of **2nd generation Intel® Core™ processors** enables smoother and compacted with **Genuine Windows® 7 Home Premium**.

Special edition extras

Anyone who loves Jay and his art will adore the N45SL Jay Chou Mystic Edition. It comes with a custom Jay wallpaper and screensaver, plus in the box you'll find a Jay-signed mouse, as well as Exclamation! post cards. The notebook arrives in a collectible box, and includes a Jay bag so you can showcase your passion wherever you go.

ASUS N Series Incredible in Sound

Audio by Bang & Olufsen ICEpower®

Simple yet sleek design by David Lewis creates a unique mood of sophisticated elegance and modernity, featuring piano-gloss covers and polished metal frames. The N Series is also extremely user-focused, delivering comfortable soft-feel touchpads, fast-type keys with reinforced springs, and a smoothed-out integrated power button. Intelligent design and meticulous craftsmanship combine to embody a spirit of advanced computing and purely sensational simplicity.

SonicMaster delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like stand-alone hi-fi systems.

Lifelike surround

Implementing the latest codes, SonicMaster brings a 3D feel to movies and games.

Distinct vocals

Vocal performance on SonicMaster notebooks sound uncannily concert-like, as if transporting listeners to a live show.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

Powerful graphics

Select N Series notebooks ship with the latest NVIDIA GeForce mobile solutions on board, pushing exciting performance in games, high def video, and more. These graphics engines ensure high resolutions and smooth video throughout, while remaining energy efficient to promote longer battery life and usability. The 100% zero-dot-guaranteed LED screens that ship with the new N Series make the most of ASUS Video Magic image enhancement. This unique tool upscales DVD playback up to full HD. It also supervises GPU computing for greater output during intense multitasking, and works together with ASUS Splendid HD to balance color, brightness and contrast for constant viewing pleasure.

VX7

a new style of speed

FEEL THE RUSH

Experience a new style of speed with the ASUS-Automobili Lamborghini VX7

Ultra-luxe design inspired by the world-famous Italian supercars meets ASUS technological excellence. It's our most powerful notebook to date, ready to take you for a ride.

Flagship Power

Leading the exclusive ASUS-Automobili Lamborghini joint-venture series, the VX7 drives computing excitement like never before, fully-loaded with the newest technology and breathtaking power for your multimedia, gaming and productivity. Plus, it's downright sexy!

Looks Stunning

Taking design cues from the Automobili Lamborghini Gallardo and Murcielago LP640, the VX7 retains their aerodynamic and aggressive stance for a style that stands out from the crowd. Expect people to notice. Premium materials, sleek textures and bold colors complete this notebook, revving up your high-octane computing.

Packed with Tech

- All new Intel® 2nd Generation Core™ i7 Processors propel computing with extreme quad-core performance for better HD multimedia and multitasking so you get more done – faster.
- Compacted with Genuine Windows® 7 Home Premium, you're assured performance that races past the competition
- NVIDIA® GeForce™ GTX 560M graphics with giant 3GB video memory set the stage for high res gaming and none of the compromise lesser notebooks force on you.
- Up to 16GB DDR3 main memory ensure a grand touring experience of smooth performance and better output in every application.
- New Super-Speed USB 3.0 runs up to ten times faster than USB 2.0, an ideal fit for your HD content and files.

Specification

Model	VX7SX-S1190V

ASUS A Series Your Color, Your DNA

Life's vibrant and so are you. Choose a color that reflects who you are, ASUS A Series notebook with a sturdy **aluminum metal frame** is available in a variety of colors including passion red, chill blue, seduction pink, party gold, urban green and simplicity white. ASUS A Series notebook features **Intel® 2nd generation Core™ processors**, and discrete **NVIDIA® graphics with 1GB VRAM** to propel your computing. The exclusive **ASUS IceCool technology** will also keep palm rests chilled so your notebook stays comfortable even during extended usage.

Exclusive Features

Keep Palm Rest Cool

Palm rests stay below body temperature, so they feel cool even during the longest typing seasons.

Palm Proof Technology

Automatic detection that intelligently distinguishes your palm and finger. Touch pad will be automatically disabled when touched by your palm area that helps to prevent typing errors.

Scratch Resistant

Strong yet elegant multi-color aluminum textures personalize the PC experience.

Chiclet keyboard

The chiclet keyboard features wide anti-dust keys that provide a comfortable feel even after extended periods of typing.

Classy Metallic Design

Elegant color scheme based on premium aluminum textures, the new A Series offers an expressive combination of technology and style. The highly durable premium aluminum textures retain their looks and quality even during extensive, prolonged use, allowing you to do more with your A Series in complete confidence.

Palm Proof Technology Prevents Accidental Input

Unique smart detection distinguishes between the contact surfaces of palms and fingers to prevent inadvertent cursor movements during typing, plus Windows® can automatically disable the notebook touchpad when an external USB mouse is connected for a more responsive setup. This feature can be turned on and off by users easily, allowing for increased flexibility.

ASUS IceCool Technology

Heat pipes and vents combine with an exclusive dual-sided motherboard design to place hot components on the underside.

This helps lower operating temperatures, and ensures palm rests and typing surfaces stay cooler. Using the notebook remains comfortable even during the longest computing sessions.

iF Award-winning Ergonomic Chiclet Keyboard

The elegant iF-award winning chiclet keyboard features large key cap gaps and sturdy buttons that make it easy for users to type accurately and comfortably. The anti-dust keyboard design also prevents the accumulation of dust that may cause harm to its internals.

Specification

Color: Amethyst Gray

Party with Prime

Primed for Entertainment with Ultra Performance

- The world's first NVIDIA® Tegra® 3 quad-core processor tablet delivers silky smooth performance.
- Play HD games, multitask, or connect to HDTV for a Full HD 1080p experience.

Primed for Unrivalled Visual Acuity and Supreme Sound

- Super IPS+ panel provides vivid images and fantastic brightness for outdoor reading. With 178 degrees of visibility, files and media can easily be shared with friends inside, outside, or at just about any location.
- Scratch-resistant Corning® Gorilla® Glass allows you to place the Transformer Prime in your bag without worrying about scratches.
- ASUS SonicMaster Technology produces an incredibly rich audio experience.

Primed for Photo Shooting and Video Recording

- Capture moments in either Full HD 1080p video or crystal clear photos using the 8MP auto-focus rear camera with LED flash, back-illuminated CMOS sensor, and large F2.4 aperture.

Stuff FEBRUARY 2012: TEST
"iPAD-baiter, netbook-beater, console-killer-the Transformer Prime is a stunning all-rounder"

CHIP FEBRUARY 2012: Review
"Long lasting batteries excellent performance smooth interface"

Majalah Tech FEBRUARY 2012:
Test / Gajet
"Amazing user experience with Transformer Prime's mobile dock"

Typing on
a tablet is not easy.

Admit it! You miss the touch and feel of a real QWERTY keyboard. You deserve a better choice.

Productivity with Prime

Primed for Mobility with Slim and Light Design

- The ultra-slim 8.3mm construction with its metallic-spun exterior is both fashionable and functional. Stand out from the crowd with this uniquely designed machine.
- Portability without burden. At 586g, you will never have to sacrifice weight for performance.

Primed for Uncompromised Productivity

- Transform the Prime into notebook mode and use its full QWERTY Chiclet keyboard and unique Android function keys to get your work done quickly.
- Enjoy up to 18 hours (2) of battery life when docked for all day computing. The Pad charges automatically when connected to the Mobile Dock.

Primed for Easy Access

- Includes a USB port, SD card reader, and microSD card reader for extended storage capabilities. With free lifetime 8GB cloud storage accessible through ASUS WebStorage, you can easily share your media and documents with colleagues.
- Android 4.0 Ice Cream Sandwich upgradable, for the best user experience possible: New camera UI, panorama mode, offline browsing, as well as Wi-Fi Direct. Free FOTA update coming soon.
- SuperNote makes it easy to jot down ideas in handwriting on the 10.1" display. You will never need to carry heavy paper notebooks again.
