ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (Q4, 2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in China
- The Top 3 notebook brand in Western Europe
- The Top 4 notebook brand in Asia Pacific

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989.
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard inside.

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS has the best quality & reliability notebooks.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The world's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality & Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the **Wall Street Journal Asia**.

ASUS received 3,886 Awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organizations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS Now Southeast Asia's Second Biggest Notebook Brand

Due to consumer trust in ASUS quality and innovative designs, the company has become one of the regional top two notebook brands based on 2011 whole-year performance

ASUS celebrates another year of business excellence in 2011. Achieving a 145% growth rate last year, ASUS is the only PC brand to display strong expansion for 12 consecutive quarters, despite prominent seasonal factors and a tough global macro-economic landscape with deep impact on Southeast Asia markets and consumption.

According to IDC's whole-year 2011 rankings, ASUS has become one of the top two notebook brands in Southeast Asia.

Commenting on this, George Su, Business Development Manager for ASUS, said:

"New ideas and technologies pave the way for success"

"ASUS greatly appreciates the recognition we and our products receive from consumers, and would like to thank all channel partners for their great support. We will continue to provide the best quality products through consistent innovation and persistent perfection."

Survey of 30,000 notebooks lists ASUS as top of reliability ranking

On November 16th, 2009, SquareTrade, the largest independent warranty service provider in United States, published a report that analyzed the failure rates of over 30,000 new notebook computers manufactured by the leading 9 notebook brands over the past 3 years. A minimum of 1000 unit notebooks of each brand was sampled.

According to this survey, ASUS laptops failed just over half as frequency as HP, which makes them a solid bet in terms of reliability

With 3 years malfunction rates to be under 16%, notebooks from ASUS are nearly 40% more reliable than Hewlett-Packard, the worst performer in this study. The industry leader HP, which shipped nearly 16 million notebooks in the pass year according to IDC, ranked dead last in this reliability study with over one-fourth of notebooks expected to malfunction in 3 years. Gateway and Acer, the No.2 maker of notebooks, were also nearly unreliable as HP, with an expected malfunction rate of over 23%.

SquareTrade Report disclaimer:
- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis.
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data.
- We did not take into consideration purchase location.
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied, about the data accuracy of the data.

Extreme Test Ensure TOP-QUALITY NOTEBOOKS

Take a look at what makes ASUS notebooks the most trustworthy in the business. If we listed every test and step our engineers actually use to make sure you get the best notebooks possible, this would go on forever — so consider this a taste!

Express yourself confidently thanks to keyboard durability tests, where special robots punch each key to check its feedback and lastability even in the face of some brutal input!

Riding on bumpy roads, some PCs may start falling apart. Not ASUS notebooks. Harsh vibration testing ensures parts stay put and performance remains consistent even when the shaking starts!

❖ Abrasive resistance testing subjects ASUS notebook exteriors to friction, indicating colors and surface materials stay at prime condition even after extensive and demanding use.

❖ Abrasive noise tests check for loud fans, storage, even power delivery buzz, hushing them to create quiet notebooks. The entire chassis then passes audio tuning to deliver the best sound possible.

❖ Premium panels must handle limited spaces such as suitcases, and allow you to touch them without causing damage or distortion, so panel pressure testing ensures ASUS notebooks only use the best.

❖ Notebook lid hinges are weak spots. Use cheap materials and they'll snap. Vigorous hinge testing conducts thousands of open/close cycles, making sure hinges last the life of your notebook.

❖ Shock testing takes notebooks and simulates incidents that occur during shipping. With a big smile on their face, engineers make sure the notebooks survive these with no performance penalty.

❖ Twist testing checks chassis rigidity. Grabbing the notebook with one hand? No problem, this trial checks for uneven twist force endurance to give you the flexibility you need.

❖ Halt testing stands for «Highly Accelerated Life Test», and expressmoves notebooks through their typical life cycle to ferret out problems, with extensive analysis conducted by engineers.

❖ Port testing ascertains contacts and plugs are solid for frequent plugging / unplugging and can handle cable quality variations without data transfer and fidelity degradation.

❖ Tough temperature tests verify diverse operating conditions, from every low temperatures to high heat, including humidity for accurate results. Whatever the mercury shows, ASUS notebooks can take it.

❖ Drop testing proves notebook free fall resistance. ASUS quality means notebooks handle drops with no damage to internal components or external design, far beyond industry standards.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission throughout the 600-day period. [The ASUS notebooks never overheated like some of the ones made by other companies.] said Sergei Avdeev, the Russian astronaut on the space mission. [Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem.]

On the Road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centre, enabling both email communication and bidirectional video conferences. [Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw,] said Aviv Shweky, the race organizer.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly; it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. [They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable,] said Wang.

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 notebooks and amazed at their ability to withstand the vibration of the aircraft," Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 notebooks in all our aircraft and to link them to the onboard navigation computers."

On the world's highest peak ASUS Notebooks are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS. A Slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS u5 even made it to the top of Qomolangma Peak at a staggering height of 8,848,43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

ASUS Pick-Up & Return Service at Your Door Step

Still finding a nearest Service Center? Or too busy to send over your notebook to a particular Service Center?

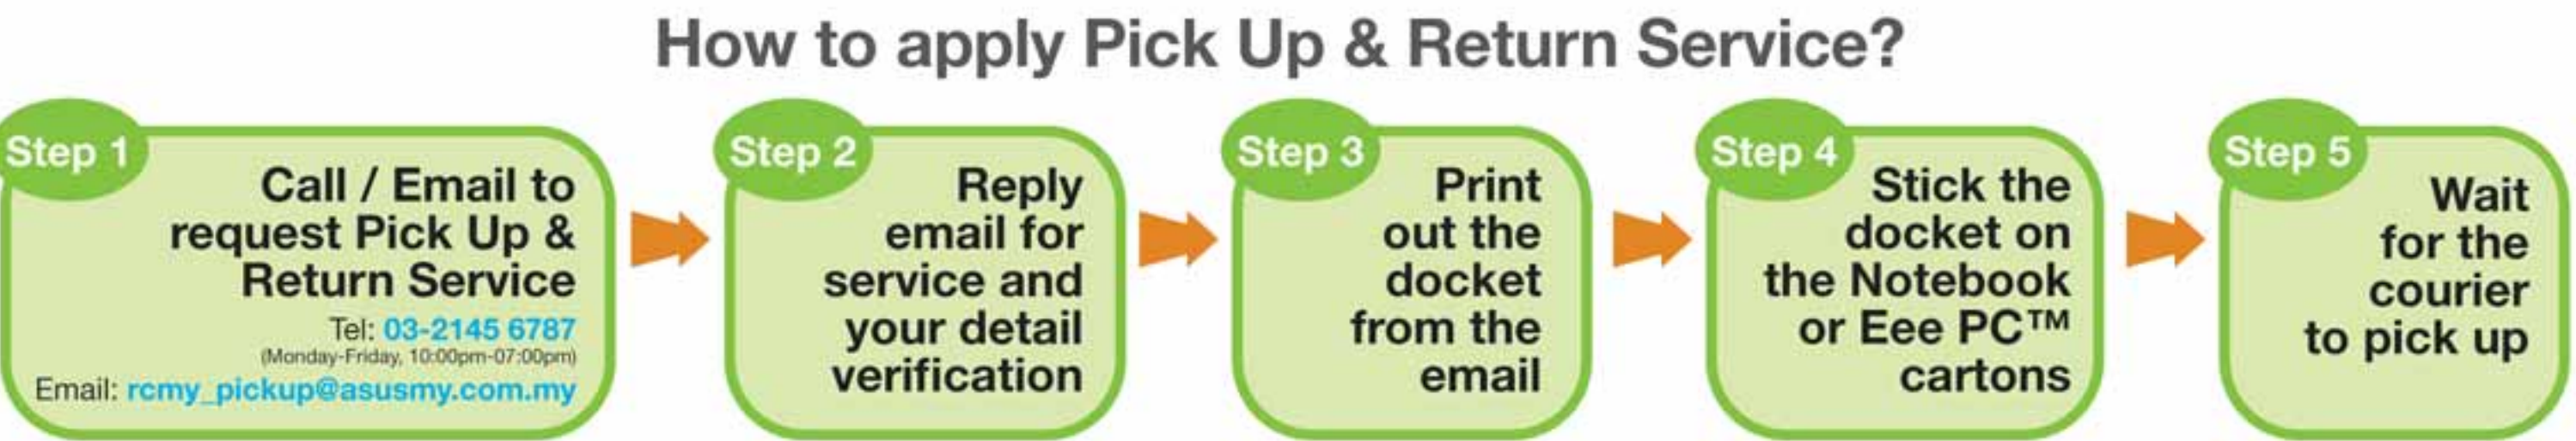

Now, ASUS provide an exclusive solution for you! Other than 2 years Global Warranty, ASUS also provide a premium **PICK UP & RETURN SERVICE** for end users & dealers. Pick up & return service allows end users to request for door-to-door pick up service or you may just drop your notebook/Eee PC to your nearest dealers.

While for dealers, a simple call/email will instantly get a specialist to pick up the notebook/Eee PC from your outlet in order to save your time and human resources. In terms of pick up lead time, we can provide earliest of 1 day and latest of 4 days to assure the quality of our service.

There are only 5 simple steps to apply ASUS Pick Up and Return Service.

- Terms and Conditions:**
- (1) The Pick-Up & Return service applies to ASUS Notebook and Eee PC only.

(2) The Pick-Up & Return service for defective unit within warranty period will be free of charge.

(3) Out-of-warranty, non-defective or customer-induced damage units are not covered by Pick-Up & Return service. In such cases, dealer or end user needs to carry in for repair.

(4) Pick-Up & Return service only applies to RMA repairs and does not apply to DOA claims.

(5) Any Location/City/Town not falling in any zone listed in zone table will be considered non-service area. Any shipment to non-service area is subjected to additional service rate or charge.

(6) Additional service charge is applicable for delivery to any Island (e.g. Langkawi, Redang, Pangkor and etc) except Penang Island.

ASUS Global 2 Years Warranty

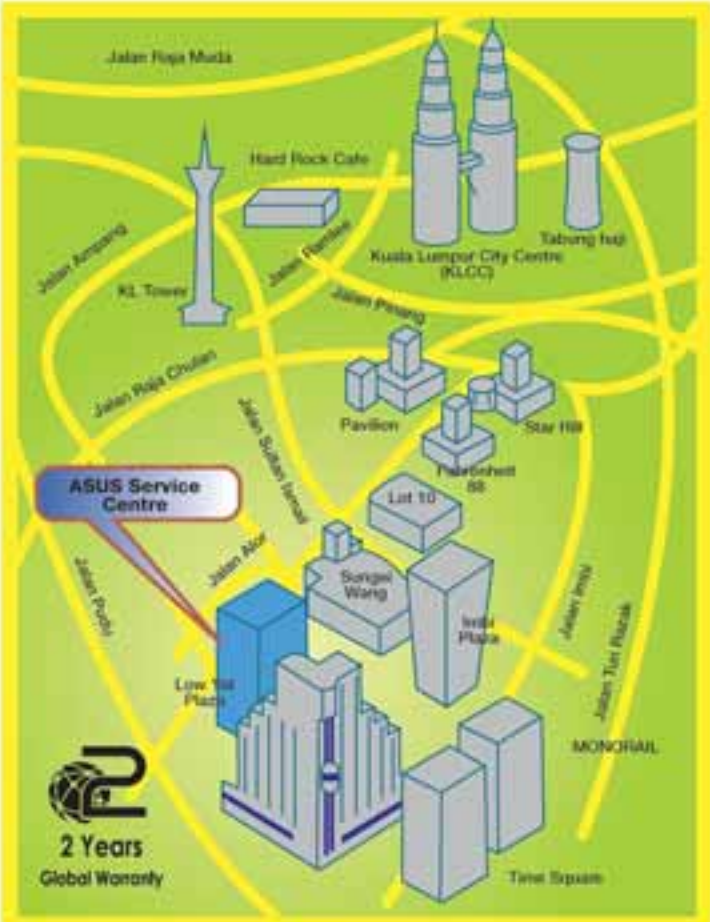

ASUS offers Consumers 2 years Global warranty on Notebooks* *Applicable for selected notebook models only

Unlike brands that promise multiple years of product warranty but charge users components and repair fees after the first year, ASUS 2 years Global warranty is applicable both domestic and global in **57 countries**. By providing a real warranty to protect your purchases, ASUS demonstrates confidence in its ability to offer unrivaled quality wherever you may go. Eee PC netbooks are covered for 1 year global warranty.

Notebooks that exceed your expectations

Incredible Beauty

The original ZENBOOK design brought the world a marriage of design and top-end performance, impressing with a spun metal finish consisting of concentric circles that represent the infinity of incredible possibilities you seek. Refined and durable, the polished metallic look delivers timeless attraction: subtle, eloquent, and powerful in every sense. For the more subdued and considered out there, this may well be the most tantalizing portable PC ever made.

Incredible Experience

The Incredible Experience is designed for people who need a solid, reliable notebook for everyday activities. The range includes both affordable all-round models and high-performance portables.

Incredible Transformer

The Transformer Pad comes in three stylish colors: Royal Blue, Iceberg White and Torch Red. With a profile that's 9.9mm thin and 635g light, the Transformer Pad can easily be carried around all day, and when combined with the ASUS exclusive Mobile Dock, it turns into a productivity workstation.

Incredible Performance

The fastest processors and most powerful graphics, combined with striking design, make the Extreme Gaming Series a must for anyone who wants to game on the go.

Incredible Multimedia

Crystal-clear screens, fast processors and powerful graphics deliver outstanding multimedia performance, whether you creating digital content—or just enjoying it.

Incredible Value

Holding true to its "Easy, Excellent, Exciting" vision, ASUS has steadily upped the ante on netbook development across the realms of design, services and performance. The Eee PC™ netbooks also feature the very best and very latest in technology.

Incredible Mobility

The Zen design philosophy ASUS first employed in the ZENBOOK™ continues with the PadFone. The concentric circle finish found on the back of the PadFone and the PadFone Station provides a comfortable grip while accentuating elegant style.

ASUS Notebook Feature

Super Hybrid Engine II

Super Hybrid Engine II incorporates elements of its SHE predecessor and builds on the vitals of better battery performance. Importantly, should battery levels fall below 5%, data is automatically saved and secured on the hard drive*.

Instant On

Always instant on in 2 seconds with up to 2 weeks standby time

USB Charger+

Exclusive Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turn off

USB 3.0

Transfers data and HD multimedia content up to 10X faster than USB 2.0 for speedier file sharing and data backups

Palm Proof Technology

Automatic detection that intelligently distinguishes your palm and finger. Touch pad will be automatically disable when touched by your palm area that helps to prevents typing errors.

ASUS Master the Six Elements of Better Sound

Six good reasons to choose a notebook with ASUS SonicMaster Technology

1. Better sound processing ensures crystal clarity
SonicMaster uses sound processing approved to Bang & Olufsen ICEpower standards, considered the best and most professional in the audio industry. Such high quality guarantees maximized clarity and minimized noise.

2. Wide sound frequency captures every note
Faithful reproduction delivers the most complete audio range available on any notebook PC, so no matter the source, SonicMaster renders it naturally with superior fidelity.

3. Large speakers produce impressive bass
SonicMaster-certified notebooks use oversized speaker chambers up to a massive 108cc, much bigger than the norm for a notebook. This means truly impactful bass reproduction and deeply resonating sound.

4. Powerful volume brings sound to life
Doing away with the tinny output of traditional notebooks, SonicMaster fields super-charged amplifiers driven by a dedicated power supply. This results in impressive volume control and consistently peerless sound quality.

5. Focus on vocals

The advanced sound processing applied in SonicMaster dynamically fine-tunes audio sources to bring out lifelike human voice, so every lyric stands out.

6. Living surround

With its active reshaping of sound waves and expanded frequency spectrum, SonicMaster has the power and responsiveness to create an immersive sound field of great spatial accuracy. Listeners are enveloped by pristine audio.

Scratch Resistant

Strong yet elegant multi-color aluminum textures personalize the PC experience

Chiclet keyboard

The chiclet keyboard features wide anti-dust keys that provide a comfortable feel even after extended periods of typing

Keep Palm Rest Cool

Palm rests stay below body temperature, so they feel cool even during the longest typing seasons

ASUS ZENBOOK™ IN SEARCH OF INCREDIBLE

Setting new standards in technology and fashion, ZENBOOK Prime measures just **3mm front and 9mm back**. It uses **precision-crafted aluminum** throughout its monoshell build, **ensuring light durability**. The cover features finely-etched concentric circles that embody the infinite nature of Zen thinking, and the entire design has been optimized to offer a holistic approach towards combining beauty with speed. To maintain this look and feel, ASUS has developed a lineup of ZENBOOK Prime accessories that are just as attractive and sophisticated.

Notebook with SATA III SSD

Reduces power consumption while expediting boot up, so users save time and energy

Quick Charge. Even When Powered Off

Exclusive Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off

Trend-Setting Speed and Power

ASUS engineering has been able to accomplish the feat of bestowing ZENBOOK Prime with uncompromising technical excellence despite its ultra-suave and compact form. Up to **3rd generation Intel® Core i7™ processors (Ivy Bridge platform)** are at the heart, while **Genuine Windows® 7 Home Premium (64-bit)** and **SATA 6Gb/s SSD** storage outpaces normal hard drives by up to four times. Similarly, **USB 3.0** ensures data moves up to ten times faster than USB 2.0, and **Bluetooth 4.0** offers the latest version of the wireless connectivity standard. **Dual band 2.4GHz/5GHz Wi-Fi** derived from top-end ASUS router technology ensures the fastest networking, and to keep all of this cool, a proprietary V-shaped air channel drives heat away before it can cause instability.

The art of entertainment

ZENBOOK Prime fields a vivid **full HD 1080p IPS** panel that brings visuals to breathtaking life with **350cd/m2 brightness and 800:1 contrast**. Its anti-glare materials reduce distracting reflections and unsightly fingerprints, while **IPS technology** affords wide **178° viewing angles** so more people can look on the better

quality from almost any direction. Even in the dark, ZENBOOK Prime shines, using a high-comfort backlit keyboard so you can keep typing and enjoying without disturbing others. And for face to face communications, the built-in **HD camera** does your conversations great justice.

To complement its superior visual finesse, ZENBOOK Prime includes exclusive **ASUS SonicMaster audio technology**, developed together with **Bang & Olufsen ICEpower®**. Sharper high notes, clearer vocals, deeper bass, and a wider sound range all impress, completing a remarkably attractive portable multimedia package.

ASUS ZENBOOK™ - The Incredible Ultrabook™ Do you believe in love at first sight?

ASUS ZENBOOK™ is an exercise in philosophy, epitomizing tranquility that seamlessly integrates with the lives of users. It is an initiative to fuse beauty, strength and stability in pure unison, built on new values, and evolved for a new age where finding what's truly important in our lives is more vital than ever.

Incredible Responsiveness: Smartphone-like experiences with 2-week standby time

One of the key advantages of the ASUS ZENBOOK™ is its smartphone-like spontaneity and always-on design. Regardless of how long the Ultrabook™ remains in it can standby, **resume in just two seconds** thanks to exclusive **ASUS Super Hybrid Engine II technology**. In effect, this means users have no reason to shut the ASUS ZENBOOK™ down, eliminating the need for lengthy boot ups. And with exclusive ASUS Super Hybrid Engine II technology, the ASUS ZENBOOK™ can stay in standby for up to two weeks. **Instant on functionality automatically backs up data to the SSD should the battery level drop below 5%**, removing the risk of data loss due to a drained battery. The ZENBOOK™ therefore adds worry-free usability to its list of advantages.

ASUS Super Hybrid Engine II powers true 2-second instant on resume.

Quick Charge. Even When Powered Off

USB 3.0 ports for Superspeed performance that's 10x faster than existing USB 2.0. Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off.

Wide Viewing Angle

Premium screens support up to 150° horizontal by 120° vertical angles, expanding visual enjoyment from almost any direction. ASUS brings you living room image fidelity, with uncompromising display finesse that gives you the best viewing possible.

Wider and more vivid views

All new N Series notebooks feature **advanced wide-view panels that provide 150° horizontal by 120° vertical angles**. These allow for better shared viewing of content by several people, and mean image quality remains uncompromised from almost any direction. Every panel offers at **least 720p HD**, and optional panels support **full HD 1080p** for even **finer image quality with improved clarity, brightness, and contrast**.

ASUS recommends Windows® 7.

Powerful performance with an always on and always connected experience

Tap into the smoothness and spontaneity of true **2-second instant on resume** with **ASUS Super Hybrid Engine II technology**, giving N Series notebooks smartphone-like immediacy. Coupled with the might of 3rd generation Intel® Core™ processors and the convenience of exclusive USB Charger+ quick device charging, the N Series embodies portable power.

SonicMaster Premium delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like stand-alone hi-fi systems.

Distinct vocals

Vocal performance on SonicMaster notebooks sound uncannily concert-like, as if transporting listeners to a live show.

Deeper and richer bass

SonicMaster's large speaker chambers and bass extension algorithms ensure impressive bass performance.

Lifelike surround

Implementing the latest codes, SonicMaster brings a 3D feel to movies and games.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

Elegant, luxurious design

Although brand new, N Series notebooks have already secured a coveted **2012 reddot design award** for their attention to stylish materials and design considerations. They offer consumers an attractive hairline-etched metallic cover with an illuminated ASUS logo for added impact, plus a unique ripple-effect speaker mesh that signifies the flow of sound provided by SonicMaster Premium.

BORN TO CONQUER
ASUS G SERIES 3D
THE ULTIMATE FIGHTING MACHINE

Inspired by the stealth fighter, the G Series regains superiority over the competition with advanced design and battle-hardened build quality. The soft, sleek but muscular lines will allow you to outmaneuver and dominate ungainly competitors, while the advanced thermals and gamer friendly design will keep you immersed in the truly 3D gaming experience for longer.

ASUS recommends Windows® 7.

Extreme Performance
A Blisteringly fast Intel® 3rd Generation Core™ i7 CPU

Realistic 3D Experience
The latest NVIDIA® GeForce™ GTX graphics with Active Shutter 3D Technology

Intelligent Cooling
Dual fan exhausts and efficient thermal design.

Gamer-Centric Design
Seamless one-piece backlit keyboard with isolated arrow keys and ergonomic inclined design.

Uncompromised Performance

There's a new emperor ruling the world of mobile gaming. The G Series breaks new performance barriers with the uncompromising power of a **third generation Intel® Core™ i7 CPU**, **Genuine Windows® 7 Home Premium (64-bit)** and an **NVIDIA® GeForce® GTX 660M/670M GPU with 2GB/3GB of GDDR5 VRAM**. The G Series establishes itself as the fastest notebook in the land and will not only feed amazing gaming experiences today, but is primed to continue delivering them for years to come. It also includes **support for 2 second instant on** when equipped with an **SSH or SSD hard drive**, meaning you no longer have to wait to frag.

Incredible 3D Experiences

The G Series is already destined to become one of the true greats in the world of mobile gaming, but with support for **NVIDIA® 3D Vision™ 2**, including **3D Active Shutter** and **3D LightBoost technology**, its place on the hall-of-fame is virtually guaranteed. Games, photos and movies can be experienced like never before – in **Full HD and true 3D!**

An Intense Audio/Visual Feast

Eye strain will be a thing of the past with the G Series's matt finish anti-glare display, while the wide viewing angle reduces the dead zone and helps to improve visibility during gaming – particularly in dark environments. The built-in subwoofer, complete with SonicMaster audio technology ensures a rich and powerful experience that will ward off challengers.

Incredible Thermal Efficiency

The G75VW packs a massive performance punch, which needs to be kept cool – the **dual fan filter system** enables you to keep your **system running cooler and quieter, for longer**. The unique, intelligent thermal design improves power and thermal efficiency by exhausting hot air from the back of the machine, enabling you to leave the competition battling for survival in your wake.

ASUS NEW A SERIES

Dive into colorful living

Chill your touch with IceCool Technology

Stand out from a sea of mediocrity with the ASUS A Series. Available in passion red, electric blue, pure white, smoky black or dark indigo, its streamlined aluminum lines deliver a luxurious, premium feel. The A Series delivers uncompromised performance with the **3rd generation Intel® Core™ i5 processor, Windows® 7 Home Premium (64-bit), NVIDIA® GeForce® 600 Series graphics processor**. In addition, the **ASUS Super Hybrid Engine II technology** increases energy efficiency and gives the **A Series instant on 2-second resume capabilities**. Put those together with **ASUS SonicMaster Lite technology** and the A Series provides an immersive multimedia experience.

SuperBatt Technology

Unique battery design on ASUS notebooks extends recharge cycle longevity by up to 3X

SonicMaster Lite

Exclusive ASUS audio technology enhances multimedia enjoyment with clearer, more powerful sound in every application

IceCool Technology

Palm rests are kept below the average temperature of the human body, even after long hours of computing

ASUS recommends Windows® 7.

Refined beauty by design

The ASUS A series features an **aluminum construction**. It features a sleek, wedge-shaped design with a textured finish.

Keeping computing cool and easy

The A Series has an array of features designed to make computing easier. It features an **ergonomically-designed iF Design award winning chiclet keyboard**; while **IceCool Technology** places heat-generating components away from the palm rest, ensuring a comfortable typing experience for users even after prolonged periods of use.

It is accompanied by a large multi-touch pad for smooth, intuitive fingertip control. **ASUS SuperBatt Technology** provides an **extended battery charge-cycle lifespan that is up to 3x** that of normal notebooks.

Computing with a smartphone-like user experience

The A Series features a smartphone-like “always on” user experience thanks to the **ASUS Super Hybrid Engine II** with instant on technology. It enables the A Series to **resume from sleep mode in just 2-seconds**, and provides **up to two weeks of standby time**. In addition, it **automatically secures and backs up data** when the **battery drops to 5% charge**.

Amazing audio

SonicMaster Lite

ASUS SonicMaster Lite gives the ASUS A Series the ability to deliver more powerful sounds and richer bass to provide the best audio experience in the mainstream notebook class.

ASUS X·SERIES

Your true attitude in stylish color

Designed gorgeous, X Series notebooks offer patterned covers and palmrests that evoke the feel of a classic suit for a gentle urban touch. They are stylish, ultra-thin, and light, with several colors for your personal expression. New **SonicMaster Lite** audio* uplifts sound experiences, while **2-second instant on** gives you smartphone-like response. To boost comfort, the improved touchpad delivers better gesture input, and IceCool technology keeps your wrists chilled at all times.

SonicMaster Lite

IceCool Technology

Smart TouchPad

Stay comfortable with IceCool technology

Exclusive ASUS engineering has created a unique internal layout that keeps heat away from palm rests and from users. Always below body temperature, palm rests feel cool to the touch, and are therefore more comfortable to use even during long sessions.

Smartphone-like responsiveness with instant on*

Only ASUS notebooks offer you true 2-second instant on resume from sleep or hibernate, cutting out long reboot times and putting you back to work or enjoyment right where you left off. Thanks to ASUS Super Hybrid Engine II technology, you also get up to 14 days of standby, with auto data backup should battery charge drop to 5% or less.

*Actual X401 standby time may vary due to specific component performance, connected devices, and environmental differentiation.

Powered by the world's first Quad-core processor NVIDIA® Tegra® 3 4-Plus™, the Transformer Pad browses the web and plays 1080p video at blazing speeds. The snappier response time and better multi-tasking performance make the Transformer Pad a true mobile entertainment powerhouse.

IPS Panel provides vivid images on the go

A brilliant IPS Panel brings viewable angles up to 178 degrees wide, while presenting excellent and vivid graphic images that produces 50% better and more accurate color range. Displayed in high brightness, it's able to tolerate the sunlight, so you can enjoy it regardless of the environment that you're in.

Transform to notebook mode with a full QWERTY chiclet keyboard mobile dock and up to 15 hours* of battery life

Admit it! You miss the touch and feel of a real QWERTY keyboard. The Transformer Pad offers you a choice to enjoy both notebook mode and tablet mode with the optional mobile dock.

The mobile dock offers a full QWERTY keyboard with touchpad and USB port, while also extending battery life to an incredible 15 hours for all day computing on the go.

Incredible audio experience with ASUS Sonicmaster Technology

Tuned by the ASUS Golden ears team, audio on the Transformer Pad is delivered with the most precise processing protocols and codecs, superior speaker construction and large resonance chambers for unforgettable audio enjoyment.
