K43SD

Stay cool with metallic chic

Strong yet elegant multi-colour aluminium textures personalise the PC experience, expressing different moods and mindsets through an exciting look based on durable and lightweight metal covers that look great no matter how you use your PC.

IceCool Technology

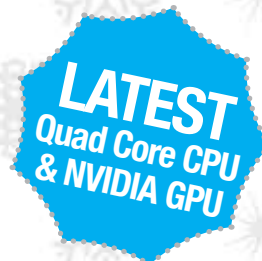

A unique dual-sided motherboard on new K Series notebooks puts hot components on the underside, away from users. Palm rests stay below body temperature, so they feel cool even during the longest typing sessions.

The all-new K Series from ASUS has arrived, featuring the power of 2nd Generation Intel® Core™ processors and NVIDIA discrete graphics with massive dedicated video memory. It also delivers a unique design that uses multi-coloured aluminium textures to express your personal style, and makes sure you stay comfortable while typing with exclusive ASUS IceCool technology.
