aboutASUS

ASUS is a worldwide top-three consumer notebook vendor and maker of the world's best-selling, most award-winning, motherboards. A leading enterprise in the new digital era, ASUS designs and manufactures products that perfectly meet the needs of today's digital home and office, with a broad portfolio that includes motherboards, graphics cards, optical drives, displays, desktop and all-in-one PCs, notebooks, netbooks, servers, multimedia devices, wireless solutions, networking devices, tablets and smartphones.

Driven by innovation and committed to quality, ASUS won 4,168 awards in 2012 and is widely credited with revolutionising the PC industry with its Eee PC™. ASUS has more than 12,500 employees around the globe with a world-class R&D team of 3,800 engineers. Company revenue for 2012 was approximately US\$14 billion.

ASUS is the Top 2 Consumer Notebook Brand in the World

According to the latest IDC report (2012 Q4), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 consumer notebook brand in South East Asia
- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in China
- The Top 2 notebook brand in Western Europe
- The Top 3 Android Tablet Brand in the World

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
 - One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard
- The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS received 4,168 awards in 2012

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

Zero defects during 600 days in space!

Two ASUS notebooks were selected by R&K, a major computer and electronics supplier to the aerospace industry, to provide astronauts with dependable computing hardware.

"ASUS notebooks never overheat like those made by other companies," said Sergei Avdeev, one of the Russian cosmonauts. "Thermal flow in space and on Earth is completely different. Only notebooks with the best cooling can survive continuous operation. We used our ASUS notebooks all day without a problem."

In the air

Helping the NRMA CareFlight helicopter rescue unit save lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit serving New South Wales in Australia, uses ASUS notebooks in different fields, including aviation, medical treatment, and administration. ASUS notebooks play a critical role in CareFlight improving survival rates in severe head trauma incidents. They help medical teams arrive on-site faster than ambulances, with fatalities lowered by 33%.

"All our pilots are very impressed with ASUS notebooks and amazed at their ability to withstand aircraft vibration," said Mark Lees, Community Relations Manager of CareFlight. "We are ready to install ASUS notebooks in all our aircrafts and link them to onboard navigation computers."

On the road

Flawless performance during grueling off-road racing.

ASUS notebooks performed critical tasks at the PATAGONIA 2000 race, which saw them used in hote deserts and snow-covered mountains. They acted as navigation devices, exceling due to their built-in GPS functionality and dynamic map displays. They were also mobile communication centers, enabling email and video conferencing.

"Needless to say, ASUS computers survived the severe conditions of this strenuous voyage without a single flaw," said race organiser Aviv Shweky.

At the ends of the earth

Conquering Antarctica.

Perfect performance records in freezing temperatures at the South Pole have been achieved. A December 2003 expedition that included acclaimed mountaineers Shi Wang and Jian Liu set out to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet, where temperatures drop below -100°F. Wang and Liu brought ASUS S200N notebooks to record and share their experiences.

On the world's highest peak

First notebooks to scale Mount Everest.

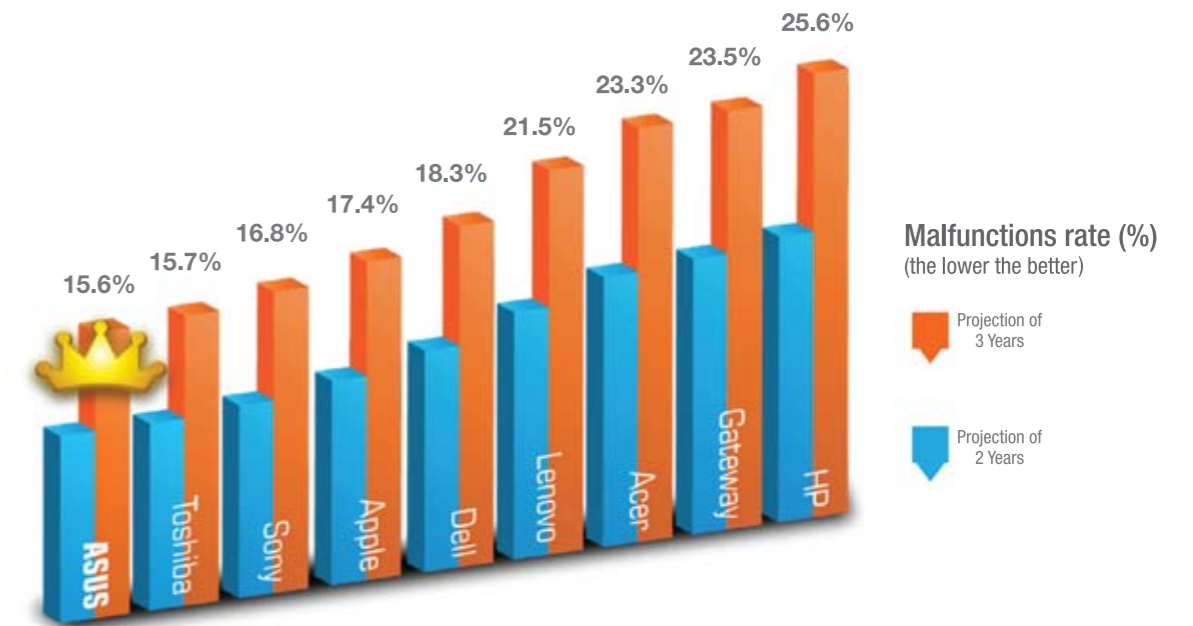

Conditions at the world's tallest mountain may faze other notebooks, but several ASUS models, including the US/56 leather and bamboo editions, W7 and U1 were chosen to accompany an expedition to the top of Mount Everest, know locally as Qomolangma. Upon reaching base camp at 500m, only ASUS notebooks continued to operate. Other notebooks failed to boot due to extremely low ambient temperatures. The US even made it to the peak at a height of 8848m, with expedition leader Captain Wang Yongfong carrying it as a tribute to eco-friendly technology and making ASUS the world's first notebooks at the top of Mount Everest.

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (pg 6).

 Square Trade, 2009/Nov/16th, Report "1 in 3 laptops fail over 3 years"

SquareTrade Report Disclaimer

- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data
- We did not take into consideration purchase locations
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied about the data accuracy of the data

Extreme Test Ensure Top-Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Keyboard Test

ASUS tests the keyboard to check the comfort and durability, especially on keys that are more frequently used.

Abrasive Test

Abrasive resistance test subjects the exteriors of ASUS notebooks to friction, making sure that the colors and surface materials stay at prime conditions even after extensive and demanding use.

Noise Test

ASUS notebooks undergo meticulous noise testing to help promote a quiet and pleasant computing environment for consumers. Noise mitigation, quiet cooling and component seals are all put to test in this set of trials.

Pressure Test

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

Hinge Test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

Vibration Test

Vibration test puts the notebooks on multiple frequency vibrations to ensure that the frame construction outside and the inside of the notebooks are always attached securely.

Shock Test

Notebooks are likely to experience shocks during shipping and day-to-day use. This is why ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Spin Test

Most of the notebook covers can be opened with one hand and this means that the screen has to be flexible. Spin tests are carried out to measure how well the lid is able to protect the notebook by testing it with a twist on the overall framework to an extreme degree.

High Acceleration Test

HALT test (Highly Accelerated Life Test) tests notebooks in high speed stimulations to simulate the movement of a mobile notebook, with an extensive analysis of our engineers to reduce the problems that may occur during transportation.

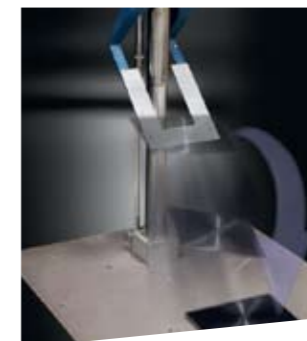

Port Test

Each port is tested to ensure that it remains strong and solid despite the continuous plug and unplug actions.

Temperature Test

Each ASUS notebook went through many trials to be able to continue to operate in diverse climates. One of the tests is to stimulate an environment of high humidity and low, and also in extreme temperature conditions. Each weak point in the material and framework is strengthened. This is the reason ASUS notebooks have high durability.

Fall Test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its notebooks through a series of drop tests to measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

ASUS received 4,168 awards in 2012

A testament to our relentless innovation and the result from years of research in design and manufacturing techniques, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide. This can only be achieved by a company with vision and mission to pursue the best innovation.

ASUS is increasingly placing emphasis on tablets and smartphones to stay ahead with consumers' changing lifestyle needs, and once again our innovation and persistence in perfection leads to a total of 798 awards for tablets and smartphones!

iF Design Awards
ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.

Innovation International CES Awards
Six ASUS products have been selected for the CES 2012 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation - Persistent Perfection has resulted in such wide recognition for our products.

ENHANCED PRODUCTIVITY

One-Finger Mode Switching

Want to switch from your laptop mode to tablet mode? Just use one finger to close the lid of TAICHI. Instantly it transforms from a laptop into a tablet interface. It's that simple.

TAICHI Stylus

Use TAICHI Stylus to sketch or to write notes in Tablet or Extend mode. Expand the scope of work achievable with ASUS TAICHI and its Stylus. Now you can enhance your productivity regardless of the nature of tasks with TAICHI.

TAICHI™ SHARING : 4 Display Modes

It's a notebook. It's a tablet. More than that, the unique function of TAICHI which enables you to switch to 4 different display modes gives you the unparalleled flexibility of sharing with your boss, colleagues to friends and family, giving you your desired privacy with the 4 different modes.

Lift the lid with one smooth motion and TAICHI becomes a fully featured notebook. The Full HD 11.6" screen features IPS technology for a vibrant image with wide viewing angles. The backlit keyboard with ambient light control and large multi-touch touchpad make light of productivity tasks too.

NOTEBOOK
MODE

Close the lid and TAICHI instantly becomes a tablet. 10-point multi-touch Full HD screen gives complete fingertip control and the supplied stylus works just like a pen on paper for accurate handwritten notes and sketches, plus IPS technology keeps the image bright and clear. Built-in motion sensors also make TAICHI the ideal for mobile gaming.

TABLET
MODE

Only TAICHI gives you 2 display screens with its Mirror mode. With the lid open and Mirror mode enabled, the 2 screens are able to display the same image which makes TAICHI perfect for sharing your favourite movie or software demonstration. IPS display technology ensures a bright, vibrant image with wide viewing angles on both screens too.

MIRROR
MODE

In Extend mode, TAICHI is no longer one computer - it's two. When enabled, the 2 screens can be used by 2 people at once, as a notebook as well as a tablet. Extend mode is ideal for presentations and the supplied Screen Share app lets the presenter see the script on one screen while the audience views the slides on the other.

EXTEND
MODE

INCREDIBLE BEAUTY

Dual High-Definition Display Screens

The ASUS TAICHI™ gives a spectacular high-definition view with apps, games and movies thanks to two 1080p Full HD displays. IPS technology ensures a brilliant image with accurate colours and crisp contrast, while the 178° wide viewing angle keeps each screen crystal-clear even when seen from the side. TAICHI can capture incredible images too, thanks to HD camera in both notebook and tablet modes.

[3mm / 9mm / 1.25kg]

Thin and Light

Even with two screens, ASUS TAICHI is able to maintain its sleekness with a front profile of 3mm and rear profile of 16.5mm. Besides that, the 1.25kg light weight adds to the ease of mobility.

TAICHI Exterior Interface

Use TAICHI as a tablet with the lid closed, or utilize TAICHI's Mirror or Extend modes for sharing your content.

TAICHI Interior Interface

Use TAICHI as a fully featured notebook with the lid opened.

INCREDIBLE AUDIO & VISUAL

5MP 1080p Exterior Camera

With 5MP exterior camera and HD interior camera, now you can take premium quality photos with TAICHI, as well as have high quality visuals during video conferences.

Premium Audio Quality Co-Developed with Bang & Olufsen ICEpower®

TAICHI features ASUS SonicMaster audio technology, developed with the world-renowned Bang & Olufsen ICEpower®. SonicMaster takes sound quality to a whole new level, with a wider frequency range for clearer vocals and resonating bass.

High Quality Conferences with background noise suppression

Array microphones with positional audio detection and background noise suppression ensure spoken communication is always loud and clear, too.

ASUS Transformer Book

World's First Intel Core i7 Detachable Notebook

One Computer, Two Ways of Working

Meet the world's first convertible Windows 8 notebook. Powered by Intel® Core™ processor, ASUS Transformer Book is two computers in one. On one hand, it's a fully featured notebook with a backlit keyboard and high-capacity hard drive. On the other hand, it's a 13.3" multi-touch tablet with Full HD screen and blazingly fast SSD. Enjoy the best of both mobile worlds with ASUS Transformer Book.

2-SEC INSTANT ON

Bluetooth® 4.0

micro HDMI

SonicMaster

2 WORKING MODES

Notebook Mode

When it comes to productivity, ASUS Transformer Book is a full featured notebook with powerful 3rd generation Intel Core processor, Intel GMA 400 graphics and 4GB RAM. The mobile dock has a wide range of ports, built-in battery and a SATA hard drive.

Tablet Mode

When it's time to relax, Transformer Book's Full HD display quickly detaches from the mobile dock and can be used as a lightweight multi-touch tablet with built-in 128GB SSD.

INCREDIBLE BEAUTY

[4mm / 11mm / 950g]

World's Thinnest Core i7 Tablet

Detached from the dock, Transformer Book is the world's thinnest tablet that is powered by Intel Core i7 with a slim profile of 4mm.

Premium Full HD IPS panel boosts display details

ASUS Transformer Book features a 1080p Full HD display with IPS technology for an incredibly crisp and detailed image with 178° wide viewing angle. IPS display technology gives vivid and accurate colors that keep the images bright and clear, even when seen from the sides of the screen. In addition, ASUS Splendid technology enhances the display of ASUS notebook panels, reproducing richer and deeper colors for visually stunning experience in any viewing scenarios.

Light Sensor automates Screen & Backlit Keyboard Brightness

The ambient light sensor in ASUS Transformer Book automatically adjusts the brightness of the backlit keyboard and the screen to suit the ambient light level, so that the keys and the screen can always be seen comfortably even in complete darkness. In addition, ASUS Perfect Stroke key technology ensures excellent keyboard feel for a comfortable typing experience.

*Battery life subject to configurations & usage

ASUS recommends Windows 8 Pro.

ENHANCED PRODUCTIVITY

Battery Up Technology

The Battery Up mode in ASUS Transformer Book enables extended mobile usages by disabling everything in the dock except for keyboard and touchpad so that the dock's battery can power the tablet for longer usage hours.

128GB SSD + 500GB SATA HDD

Dual Storage Capacity

Connect ASUS Transformer Book to its notebook dock and it instantly becomes a fully functional notebook with 500GB SATA storage in addition to the 128GB SSD capacity in its tablet mode. Exclusive ASUS high-speed bridge technology ensures blisteringly fast 5GB/sec transfer speed from the SATA hard drive too - even faster than USB 3.0!

INCREDIBLE AUDIO

Powerful Audio with 4 Speakers

Co-Developed with Bang & Olufsen ICEpower®

ASUS Transformer Book boasts of a total of 4 speakers, delivering an incredible and immersive listening experience, in addition to ASUS SonicMaster technology. SonicMaster takes sound quality to a whole new level, with a wider frequency range for clearer vocals and resonating bass.

High Quality Conferences with background noise suppression

Array microphones with positional audio detection and background noise suppression ensure spoken communication is always loud and clear, too.

ASUS VivoBook Intuitive Touch Screen Laptops

The World at Your Fingertips

Inspired by the Latin verb for "to live", ASUS VivoBook is a personal companion that blends the unique elegance of ASUS notebook design with Windows 8 touch-friendly operating system.

ASUS VivoBook embodies the spirit of touch to maximize intuitive interaction, offering naturally enjoyable user experiences that enhance every aspect of your lifestyle. It has been designed with stand-out aesthetics, true-to-life sound and instinctive touch.

They are ideal for the increasingly cloud-based nature of computing, supporting seamless connectivity and usage on the go.

ASUS INTUITIVE DESIGN

All-Glass Touchscreen. Intuitive Small Touch Points of 6mm.

ASUS VivoBook S400 ushers in completely new touch experiences with its all-glass panel. Smooth throughout, the responsive touchscreen means your fingers can slide edge to edge naturally and unhindered. This flowing motion makes swiping, scrolling, and all other gestures quicker, more intuitive, and incredibly rewarding. With small touch points of 6mm, what it means is even the small fingers of toddlers are able to operate the ASUS VivoBook touchscreen laptops smoothly.

ASUS Intuitive Instant Functions

ASUS has developed a range of Instant Functions especially for Windows 8, enabling fuller immersion in the new operating system. With just one key press, engage and load up Instant Functions for more customization options and more personal interaction with your computing environment. The interface design puts you first, so it's utterly user friendly, offering quick settings and direct access to your content. You can change the way your ASUS VivoBook works and feels in seconds!

TOP-NOTCH GAMING EXPERIENCE

Intelligent Dual Cooling System

ASUS ROG G Series packs a massive performance punch, which needs to be kept cool. Its dual fan filter system enables you to keep your system running cool and quiet. The unique intelligent design improves power and thermal efficiency by exhausting hot air from the back of the machine, enabling you to leave the competition battling for survival in your wake.

5° Ergonomic Design

With the gamers in mind, ASUS ROG G Series boasts of a 5° ergonomic design that ensures your comfort even after long hours of intense battles.

Wide Viewing Angle with Anti-Glare

The wide viewing angle of ASUS ROG Series reduces the dead zone and helps to improve visibility during your gaming sessions and particularly in dark environments. By using anti-glare panels, reflections are avoided and more comfortable to the eye during long gaming sessions.

Intense Audio Enjoyment

ASUS G750 comes with built-in SonicMaster subwoofer with MaxxAudio technology and an onboard headphone amplifier which channels extra power to the headphone. With the extra amp, headphones perform to their full potential.

TRUE-TO-LIFE 3D EXPERIENCE

Incredible 3D Experience

ASUS ROG Series is built to be one of the most powerful mobile gaming machines with NVIDIA® 3D Vision™ 2, 3D Active Shutter and 3D LightBoost Technology. Games, photos and movies can now be experienced on the ASUS ROG Series in both Full HD and true 3D!

HDMI

3D TV Output

Experience your 3D gaming action on your TV screen! 3D TV output on both Full High Definition and 3D models allows you to immerse yourself in the action fully with a bigger screen.

INTENSE GAMING PERFORMANCE

Extreme Performance with new Haswell processor

Get top speed and experience extreme gaming sessions with the latest processors.

NVIDIA GeForce GTX770MX

Microsoft DirectX 11

Powerful Graphics Down to Finer Details

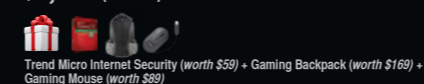

Witness the finer details of the intense graphics in your games with the powerful NVIDIA GeForce GTX770MX. Optimise your level of visual intensity with no compromise to quality nor the intensity of graphic details. With DirectX 11, leverage the efficiency and power of today's multi-core processors. Smoother 3D animators, and graphics are more lifelike and nuanced than ever before

ASUS VivoTab™ 11.6" Windows 8 Professional Tablet with Wacom Digitizer

A Brand New Start to Mobile Productivity

You are always on the go, and you need to get some serious work done. Before you had to bring your notebook with you, but now you can do it all on your VivoTab. Break the limitations of traditional tablets. Move beyond being only the spectator. Be the Creator.

With Windows® 8 Professional, Intel® Atom™ Z2760 Dual-core CPU @1.8GHz, a 11.6" screen, a Wacom digitizer stylus and keyboard dock, the VivoTab TF810 is your ideal companion for both serious work and unlimited play on-the-go.

ASUS recommends Windows 8 Pro.

ULTRA PRODUCTIVITY

Supports Windows Desktop Applications

With a Windows 8 tablet, what it means is the thorough integration with your Windows devices, be it your desktop or your laptop. Now you can run the same applications on your Windows 8 tablet. Besides, you can also connect to any PC peripherals such as your printer or scanner with ASUS VivoTab, just like how you connect with your laptop.

Supports Microsoft Office Suite

Working on your office documents such as Excel, Powerpoint, Word has never been easier. Now you can work on your documents on VivoTab Smart and sync easily with your laptop for transferring of files.

Includes Wacom® Digitizer Stylus

Use the Wacom Digitizer Stylus for precise inputs, with its 1024 levels of pressure, eraser function and right click button. Now you can write, scribble and draw with ease just like you do on paper.

Includes ASUS Keyboard Dock & Leather Sleeve

With the ASUS exclusive keyboard dock, a full QWERTY keyboard and touchpad are at your disposal. Android function keys are also at hand to boost productivity when typing. The dock can also charge the pad when required, providing a combined battery life of up to 19 hours.

64GB EMMC + Expandable SD Capacity / 2GB DDR3 RAM

High Capacity Storage & Memory

With 64GB built-in storage and expandable SD capacity, you can bring your documents with you on-the-go with easy syncing to your laptop.

Sharing made easy with NFC

Want to share some files with your friends, just use NFC (Near Field Communication) and transfer to your friend's device wirelessly within a distance of 4cm. It's that easy.

*Battery life subject to configurations & usage

ULTRA MOBILITY

Slim and Light

With a slim profile and a light weight of 675g, ASUS VivoTab TF810 enhances the ease and mobility enabling you to just bring the device along with you to just about everywhere.

ASUS understands your need for a long battery life, especially for mobile devices such as the VivoTab. That's why you can get up to 19 hours* battery life on the move.

ON-THE-GO HUB

8MP Camera with F/2.2 Aperture

Take high quality photos on-the-go with ASUS VivoTab's 8MP camera with large F/2.2 aperture and 5-element lens. It comes with built-in LED Flash for dim light situations, and its back-illuminated CMOS sensor gives you 30% colour enhancement for vivid colours.

178° Wide Viewing Angle

With an IPS panel with 178° wide viewing angle, even your friends sitting further to the sides of you are able to share the excitement of your favourite movie. Get yourself surrounded with your friends and your entertainment!

7.0"

ASUS Fonepad™ 7.0" Multimedia Tablet with Full Phone Functions

The Incredible Fusion of Phone & Tablet

We now spend more time looking at the screen on our smartphones than we do making calls, so why are their screen still so small?

Fonepad is perfect for people who value both voice communicator features of a smartphone and the increased entertainment opportunities afforded by a big-screen tablet, but prefer the convenience of carrying just one device.

Asus Fonepad is the one device for everything you do.

DUAL FUNCTIONALITY

Tablet with Full 3G Phone Functions

With full 3G phone functions, now you have the flexibility to use ASUS Fonepad according to your different needs. Its dual microphone with noise cancellation lets you have a crystal clear calling experience. When you are on the go, use a headset or just speak through the receiver with the tablet directly.

INCREDIBLE PERFORMANCE

The next generation Intel Atom Processor

Equipped with Intel Atom processor, now you can enjoy all-day computing with its power saving feature.

Long Battery Life

ASUS understands your need for a long battery life, especially for mobile devices. Now you do not have to worry about charging with up to 9 hours of all-day usage.

Expandability with Micro-SD Card Slot

If you need more storage for your entertainment, ASUS Fonepad supports up to 32GB micro-SD card storage.

Free 5GB Lifetime ASUS WebStorage

With free 5GB ASUS WebStorage for life, now you can upload, sync and share your files easily with your friends and family, no matter where they are, and data can be synchronised easily from PC to Pad and vice versa.

QUALITY VISUALS

Wide 178° Viewing Angle IPS Panel

With a wide 178° viewing angle, even your friends sitting near to you are able to have undistorted views of your photos and videos.

5.0" <—> 10.1"

Padfone™ Infinity 2-in-1 Full HD LTE Device - 5.0" Android Smartphone & 10.1" Tablet

5.0 Full HD Smartphone. 10.1" Full HD Tablet.

The Padfone Infinity is a 2-in-1 Full HD LTE device which features industry-leading 5.0" HD smartphone with a 10.1" Station. Just by docking the smartphone into Padfone Infinity Station, you can access all the apps and files on your smartphone on a 10.1" interface which are seamlessly integrated into the bigger interface.

It's beautiful unibody brush metal design, tapered edges with just 6.3mm and a light weight of 145g makes Padfone Infinity a pleasure to hold, use and carry!

It's a smartphone and a tablet, with only 1 SIM card and data plan.

TOP CLASS CAMERA

Perfect Pictures, Every Time. 100 consecutive shoots @ 8fps.

PadFone Infinity's 13MP camera with 5-element lens and f/2.0 aperture is optimized for low light performance. In addition, Full HD videos are supported at 1080 at 30fps and 720p at 60fps. Guess what, you can even take photos while actively shooting videos! Capturing something in motion? Use its consecutive shoots with its high burst rate of 8fps to capture in full clarity.

LONG BATTERY LIFE

Ultra Long Battery Life with Station

Together with PadFone Infinity Station, enjoy ultra long battery life of up to 40 hours* of 3G Talk Time! It just means that with PadFone Infinity, you won't have to worry about your battery running out while running around.

ASUS INTUITIVE SOFTWARES

ASUS Echo. Your Personal Assistant.

With ASUS Echo, your personal assistant, now you can control a range of functions on your PadFone Infinity simply by talking to it.
